

HABA Pro

Resources & Solutions for Nursery, Kindergarten, Pre-School

International Catalog 2021/2022

From **HABA** education to **HABA** Pro

inspired by children, created by experts

For more than 80 years, we have been an integral part of a large family – HABA FAMILYGROUP. Together we are strong and combine our expertise – now with a new name.

HABA education will soon be called HABA Pro. A pro for the future. A pro for education.

A pro for the future of our children!

The holistic development of children aged between 0 and 8 years of age is primary objective.

Our products are perfectly aligned to the needs and concerns of teachers. They find inspiration and materials for their day-to-day work: learning concepts, play and work materials that foster the senses, creative material and movement material for indoors and outdoors – whether in nurseries, kindergartens, pre-schools or learning centers.

In the HABA FAMILYGROUP we have compiled this variety of products for you as an ambitious school supplier from our many years of experience.

About the HABA FAMILYGROUP

The HABA FAMILYGROUP has been enriching families and institutions with high-quality products in the core areas of family life, play, education, exercise, clothing and furniture for over 80 years. Under its roof, it unites the well-known brands HABA, JAKO-O, FIT-Z, HABA PRO, project and the HABA Digital Workshop. Since its founding in 1938 by Eugen Habermaass, the HABA FAMILYGROUP, headquartered in Bad Rodach, has been family-owned. Tim Steffens is the managing director. The company employs around 2000 people and generates annual sales of around EUR 360 million.

Our Vision

is children growing up in a supportive environment which encourages them to unfold their inherent talents, because their surroundings have a decisive influence on this development – first the parents and the family, later also daycare, kindergarten and school. If children find a stable basis for their roots, enough stimulation for growth and plenty of room to develop, they can grow up with a joy all of their own.

Mission Statement

We believe: All children deserve products that are unique in terms of concept, design, play value and development character. This is why, with our products, we support all educators in creating space to grow. And these educators need experts like you who provide the best educational tools. We support you by building your portfolio with our unique learning resources grown from 80 years' of market-leading experience in Germany and enriched by the profound knowledge of experts from the fields of education and science.

CONCEPTS & DESIGN

We aim to let children grow up in an environment that promotes their development and in which they can also express their own individual personality. For this reason, we work with experts from education and science to develop teaching and learning materials that support, challenge, and are fun, while providing sound educational knowledge.

QUALITY & SAFETY

We attach great importance to excellent materials and high-quality workmanship. We manufacture many of our products at the company headquarters in Bad Rodach and test them directly in-house. ISO 9001 quality management and continuous product inspections are also very important to us.

ENVIRONMENT & SUSTAINABILITY

"taking responsibility for tomorrow today." Guided by this principle, we focus on environmentally-friendly production and modern energy management. Since 2010, many of our wood production products have been marked with the PEFC seal, because we process beech and birch wood from sustainable forestry.

UNIQUE EDUCATIONAL TOYS & SERIES

Together with specialists and experts from the education and therapy sector, we aim to develop products with which you can master the challenges in your everyday life even better. Our own products from areas such as Fröbel, Willy's Number World and Digital Starter offer a unique educational benefit and invite children to learn, experience, and explore with their age-appropriate design.

Innovation & Expertise

We support the development of children with constantly new ideas and products. We partner with experts from science and practice, who we work in close cooperation with. Together, we gather inspiration and put concrete ideas into practice that make our products for educational institutions even better.

Unique Products...

Our Classic Building Kit Wagon

...is one of our most important and most traditional products: it has featured in our product range since 1974 and been sold more than 20,000 times! This means that – statistically – every third kindergarten in Germany owns one.

AREAS OF DEVELOPMENT IN EARLY YEARS EDUCATION

Educational areas include fundamental content that is important for healthy, holistic development. They address the differing abilities and skills of individual children, and make it possible for them to discover and develop their own preferences and strengths. The combination of educational areas creates a basis for educational work and lets themes be structured in ways that are age and

development-appropriate. This also gives you orientation in the planning of activities and projects.

We have focused our product development on the education sectors and offer you a wide range of teaching and learning resources. This ensures that you can support children holistically and give them the space and opportunities to develop their personality.

Fine Motor Development

Children see the world with different eyes and feel a permanent desire to move and explore. Their journeys of discovery are full of challenges. Developing fine motor skills is crucial to overcoming these challenges. Children have to learn dexterity with both hands and hand-eye coordination. It is exciting to watch a child as they pluck a piece of grass for the first time, run sand through their fingers, or fold a piece of paper. They need an educational environment that offers a wide range of stimulating opportunities that will develop their fine motor skills.

Screw Figures Set

The head and hat form the basic frame for each figure, to which the body, legs, and feet can be attached and screwed on. Match the shades or mix up the colors! There's no limit to players' creativity.

Contents: 3 screw figures with 14 wooden elements. Material: beech. Dimensions of figures: Ø 4,8 cm, h13,6 cm.

Features:

- almost unlimited fun combinations
- smooth surface with haptic appeal
- made from renewable materials, wood
- simple placing and screw-together game
- helps to develop fine motor skills, hand-eye coordination, color and shape perception, concentration, attention skills, and creativity

384795

Magic Flowers

One shape, lots of colors, and even more arranging and stacking possibilities. The colorful blossoms with cool glitter effects can be stacked up into a tower, laid flat against each other, positioned three-dimensionally, or simply sorted by color. Since they only differ in color, they always fit perfect into, on top of, and next to each other, and can be combined into lots of patterns and three-dimensional shapes. This fosters hand-eye coordination and fine motor skills and trains shape and color differentiation and concentration.

Made in
Germany

Contents: 14 pieces.

Blossoms made of solid beech wood in 7 colors. Type: arranging game.

Features:

- with glitter effect
- fosters visual perception
- supports hand motor skills and concentration

384797

Mandala Puzzle "Fish"

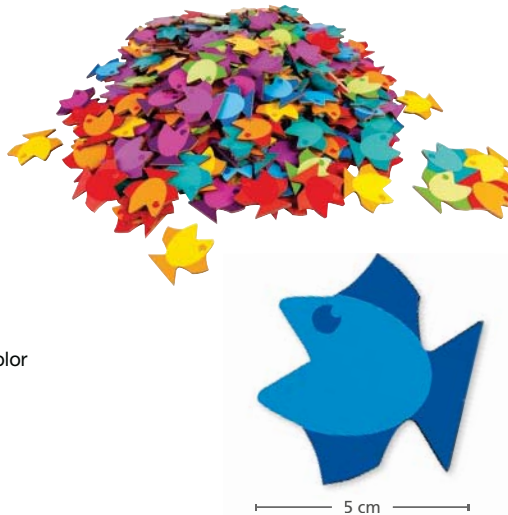

One shape, lots of colors, endless arranging possibilities. The wooden fish printed on both sides can be connected into a range of patterns and shapes, as one fish always fits with another. The bright colors and pleasantly smooth surface of the parts invite creative playing.

Contents: 48 pieces.

Material: plywood, printed with different colors on both sides. Dimensions: 5 x 5 cm, 6 mm thick.

Features:

- imaginative arranging game with colorful fish shapes
- encourages visual perception as well as shape and color differentiation
- fosters concentration, attention and creativity through parqueting

139166

Arranging Puzzle Animal Trio

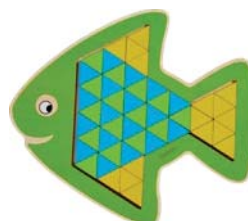

The amusing animal trio of owl, fish, and snail offers children the right framework to develop new and beautiful patterns. During play, diamonds, trapezoids, or hexagons can be formed from triangles of the same color. In this way, children themselves discover the foundations of symmetry and geometric shapes. The attractively designed learning material made from wood is highly stimulating. With the equilateral triangles, varied patterns, mandalas, or images from nature or everyday life can be arranged even without the frames.

Contents: 3 puzzles.

Animal motifs as arrangement frames, 240 arrangement triangles in 6 colors of the rainbow. Material: plywood, 4 mm thick. Dimensions: Snail 27 x 17.5 cm, triangle edge length: 1", 2.5 cm. Age: from 3 years.

Features:

- highly stimulating puzzle
- for arranging patterns and mandalas with and without frames
- trains the perception of symmetries and geometric shapes
- encourages fine motor skills, shape and color differentiation and creativity

Germany**

384808

Fröbel Marble Game

The appealing, clear shape of the ball in the bright colors of the rainbow and the material wood, which Friedrich Fröbel anchored in his educational concept, makes the game particularly inviting. The balls are laid on the board freely or following templates to form lines, patterns, mandalas, and three-dimensional structures. To increase the degree of difficulty, children can also try doing this with pliers or 2 spoons.

Contents: 86 pieces.

36 wooden balls (4.6 cm) in the colors of the rainbow (6 each in red, orange, yellow, green, blue, violet), 1 board (31 x 31 cm), 1 pair of wooden pliers, can be dismantled into 2 spoons, 30 template cards, 1 set of instructions.

Features:

- highly inviting game with a variable degree of difficulty
- for forming numerous, varied and beautiful Fröbel shapes
- 10 templates "from point to line" (lines and symmetrical patterns), "from line to area" (area-wide patterns) and "from area to body" (three-dimensional structures)
- promotes concentration, color differentiation, and understanding of symmetry
- supports fine motor skills, hand-eye coordination, and spatial perception

131144

Ball Stacking Game

The pegging parts resemble huge puzzle pieces and can be connected together as a circle or in a snake shape. The balls can be pegged together to form single-color or multi-color towers.

Contents: 32 pieces.

5 pegging parts, 2 end pieces – natural finish, 25 polished wooden balls with pins in 5 colors (red, green, yellow, blue, purple) – everything made of beech. Dimensions: ball Ø 5 cm, peg board as disc Ø 22 cm, 16 mm thick.

Features:

- pegging game for practicing numbers and colors
- fosters fine motor skills by pegging and gripping
- encourages hand-eye coordination

Made in
Germany

350195

Pegging Game Mandala Flower

The colorful wooden rings in three sizes can be placed anywhere, or arranged using the template cards, on the wooden rods of different lengths on the board.

Contents: 84 wooden rings in 9 colors (24 x Ø 2.7 cm, 18 x Ø 3.5 cm, 42 x Ø 5 cm), 1 wooden board (18 x 18 cm, H 1.8 cm) with 19 fixed wooden rods of 3 heights, 1 fabric bag, 10 template cards, instructions.

Features:

- endless creative play combining the pieces at different heights
- large, easy to grasp shapes, ideal for little hands
- bright colors: highly appealing to the senses
- helps to develop fine motor skills, creativity, visual perception, hand-eye coordination

3+ years 1 player varies

351438

3D Puzzle Beehive

To make a three-dimensional beehive, 11 double-sided printed wooden puzzle pieces need to be correctly assembled, and placed on the wooden rods on the sturdy base. Ideal for 1-2 children.

Contents: 23 pieces.

11 puzzle pieces, 12 figures, 2 wooden rods, base, booklet. Material: Wood. Dimensions: completed puzzle approx. 27 x 27 cm.

Features:

- 2 difficulty levels: "Flat Puzzling" and "Building Up High"
- with additional puzzle elements on the back
- ideal for little hands: large, easy to grasp puzzle pieces
- supports the visual communication of basic knowledge about nature
- helps to develop: hand-eye coordination, fine motor skills, spatial thinking, shape and pattern association, understanding of natural cycles

3+ years 1-2 player varies

188974

Colors Peg Game

This game teaches color recognition and identification, and matching them with the colorful pictures. The attractively designed templates with recognizable objects from everyday life inspire children to play and describe what they see. There are 2 template cards showing different pictures for each of the 5 topic areas, "Fruit and Vegetables", "Clothing", "Daily Life", "Colors", and "Nature". The pegs provide some resistance, making them easy to hold for small children or people with physical disabilities. The Peg Game includes four different games which train finger strength (pincer grasp, tripod grasp), fine motor skills, understanding of colors, and vocabulary development.

Contents: 46 pieces.

2 bases each with 9 wooden pegs (21 x 21 cm), 24 pegs in 4 colors (red, yellow, green, and blue), 10 picture cards, instructions.

Features:

- identification and naming of colors
- matching pictures from 5 everyday topics
- develops fine motor skills, understanding of colors, and vocabulary

| 10 picture cards

161724

Peg Board Shapes

Pegs are placed in the high quality peg boards, freely or using a template, and then linked together using colorful rubber rings to make geometric patterns and images. A creative way of developing fine motor skills.

Contents: 498 pieces.

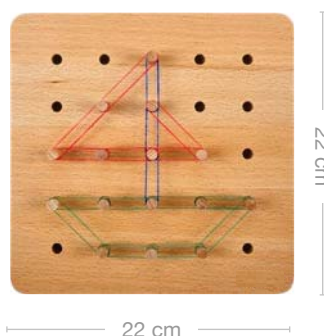

3 peg boards, 95 pegs, rubber rings in 8 colors, instructions. Material: Wood, plastic. Dimensions: Peg board L 22 x W 22 x H 2 cm.

Features:

- trains fine motor skills
- high quality

133782 Lock House

Every door of the house is locked or closed differently. This is why you need skilled fingers to open the doors. The roof can also be opened, for instance to hide small things behind the 4 doors. Keychains make sure that nothing gets lost.

Material: wood, metal.
Dimensions: W 26 x H 25 x L 35 cm.

Features:

- robust wooden house with various locks and latches
- trains the fine motor skills
- fosters perseverance and concentration

Skilled Fingers

157935

Fidget Cube

Buttons, buckles, zippers, snap fasteners, loops, and ribbons – this cube contains all common types of closures. While opening and closing, children become familiar with the closures and train their fine motor skills and hand-eye coordination.

Material: 100% polyester; fill material: foam.
Dimensions: 30 x 30 x 30 cm.

Features:

- highly stimulating
- all common closures on one toy
- for playful fostering of fine motor skills
- washable

Fröbel

371673

Fröbel Bead Threading Set

Friedrich Fröbel emphasized the clean, appealing shape of spheres in his pedagogic teachings. Their 6 bright rainbow colors and the tactile wood are as attractive now as they were back then. The beads can be threaded freely or using one of the templates to make what Fröbel called 'Lebensformen' (everyday shapes) such as figures, animals, plants, and symbols. A range of templates can be used to increase or decrease the difficulty level.

Contents: 296 pieces.

244 wooden beads (small Ø 16 mm, medium Ø 20 mm, large Ø 25 mm), in 6 rainbow colors, 20 cord stoppers, in red, blue, orange, green, 21 rubber bands, in yellow, red, blue, 10 template cards with 3 difficulty levels (easy, medium, hard), instructions.

Features:

- for threading numerous and varied Fröbel shapes
- incl. 10 template cards with 3 difficulty levels
- helps to develop concentration and attention, fine motor skills, and hand-eye coordination as well as color differentiation and creativity
- develops an understanding of proportions and symmetries

Catch the Worm!

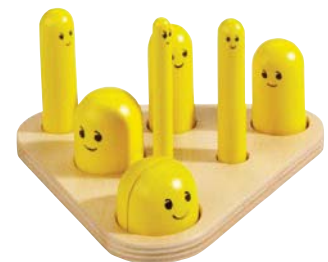

The colored die determines the color of the worms to be caught. But which gripper is the right one for which worm? Each gripper is different and can only catch a certain worm! If the player has a worm in their gripper, they now have to find the right hole on the peg board to place the worm into.

Contents: 18 pieces.

Material: wood, metal. Dimensions: gripper 16 to 17 cm, worm pegs Ø 0.8 to 3 cm, L 4 to 10 cm, peg board side length 11 cm. Contents: 4 peg boards each with 8 worm pegs in 4 colors, 4 grippers, 1 magnetic board (30 x 30 cm), 1 colored die, 1 set of instructions with game suggestions.

Features:

- 18-piece grasping and learning game with colorful elements
- encourages hand-eye coordination
- trains fine motor skills and concentration

for nimble
fingers

which worm clamp fits?

A photograph of a child in a field with trees in the background. The child is on the left side of the frame, wearing a light-colored shirt and shorts, and is looking towards the right. The background shows a line of trees with yellow and orange foliage, suggesting an autumn setting. The sky is a pale blue.

Physical Development & Team Play

Movement comes naturally to people and it is only by moving that we learn about the world around us. When children run, climb, swing, use ropes or dance, they feel what their body is doing and are aware of every step. Team games that involve lots of moving and playing are fun and strengthen the bonds within the group.

024725

Nursery Ball Pit "Meadow"

Ideal for year-round bathing pleasure outdoors. Meadow and non-slip groundsheet made of gym mat material stick together thanks to hook and loop fasteners. Also included: two flowers to stick on including rustling flower petals and horn inside.

Material: RG 25/40 foam with removable artificial leather cover; groundsheet made of non-slip gym mat material. Dimensions: 160 x 160 cm, walls 15 cm thick and 30 cm tall, back wall 55 cm tall. Filling capacity: approx. 1,500 balls with Ø 6 cm; wapprox. 750 balls with Ø 7.5 cm.

Features:

- stable connection between meadow and groundsheet by means of hook and look fasteners
- secure footing thanks to non-slip gym mat
- flowers with acoustic stimulation
- promotes motor skills and body sensation

Daycare Ball Pits

hook and loop flower with rustling petals and horn

Children can consciously experience their own body and train motor skills while playing. In the process children increase their self-confidence, self-assurance and self-competence. Shared play also makes it easier to connect with playmates and therefore encourages the development of social and language skills.

035455

Ball Pit Balls, colorful

Many soft colored balls for the ball pit. They give way but do not become dented.

Contents: 250 pieces.

Material: polyethylene. Dimensions: Ø 7.5 cm, (complies with DIN 1176 for the public domain), multicolored.

Features:

- 250 soft balls for the ball pit
- spring back into their original shape
- promotes motor skills

Made in Germany

Our expert says:

Reinhard Liebisch

Physical education expert (focus: children's health and development promotion through movement)

Combine movement and education!

This increases children's physical activity and learning while moving oneself is particularly child-friendly. For example: Choose a short story and read it out once. At the second time, children can reenact the plot and turn it into movement. Children enjoy slipping into the roles of persons or animals and using their bodies as a means of expression. This can also be integrated into projects of the topic Circus – children can balance like tightrope walkers, do gymnastics with a ball or jump through hoops like lions. There are no limits to your imagination! Also in the field of sciences

children can gain fundamental experiences through movement: they sense the effect of air resistance when moving a parachute up and down with their arms. And when they hold hands and spin in a circle they sense the effect of physical forces. Why not try it together: how fast do you have to run to keep a newspaper sheet at your someone's chest and stomach without holding it? It is very exciting for children and often an aha-experience to physically experience laws of nature through movement.

Senses Balance Path

This balance path promises plenty of exciting fun and adventure. The different boards can be walked over barefoot. These are securely fixed into the towers: max. 2 in the small, 3 in the medium, and 4 in the large towers. Towers can be used both individually, and stacked together to make 2 or 3 levels.

Contents: 15 pieces.

8 stackable towers (2 large = base, 3 medium = middle, 3 small = top), 7 balancing boards with different surfaces (1 x neutral, 1 x chicken ladder, 1 x flat pyramid, 1 x cork, 1 x steel (reflective), 1 x artificial grass, 1 x pebbles), instructions.

Material: Steel, stone, wood.

Weight: 34 kg. Load capacity: 50 kg.

Dimensions: Tower Ø 18, 22, 26 cm,

H of each 8 cm;

boards L 120 x W 12 cm,

H 5 - 10 cm.

Features:

- sensorimotor balance and play obstacle course
- easy and quick to assemble and disassemble, and adapt to each child
- double feet of the sensory boards provide excellent stability and a secure fix
- different surface structures and materials help to develop tactile perception
- helps to develop feet sensory motor skills, sense of touch, body tension, attention skills, and balance

Balance Step System

To create an exciting balance obstacle course in a supervised area, the balance steps can be placed in a row or offset on top of each other. When you need to take a rest, you can simply use the stools. Note: The stools are suitable for outdoor use. However, they should be brought indoors in poor weather and over winter.

Contents: 8 steps.

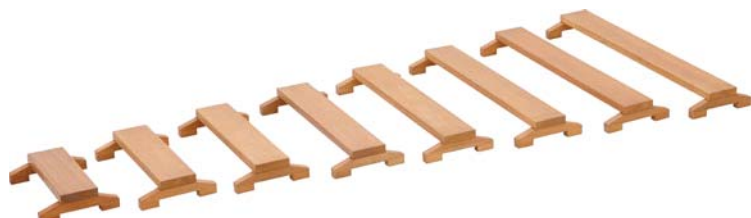

8 boards of different lengths, 16 feet.

Material: Eucalyptus wood. Dimensions: W 24.4 x H 10 cm, balance width 12 cm, L 37 - 93 cm.

Load capacity: max. 80 kg.

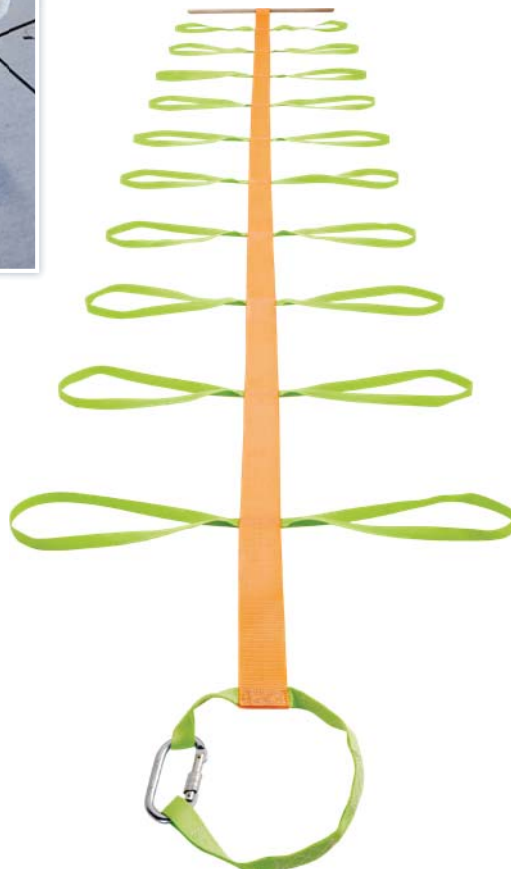

Features:

- create versatile balance circuits
- space-saving storage
- anti-slip gliders guarantee a secure footing

Fun guaranteed!

107635

Balancing Rope

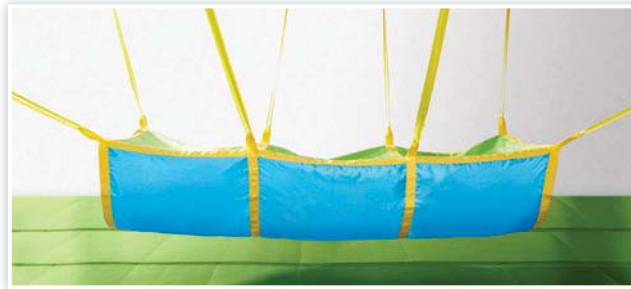

Balancing with strength, dexterity and team spirit. The balancing rope is firmly attached, e.g. to a bar on a rung wall, with the two loops at the end of the rope and the screw carabiner. The 10 loops on both sides let the balancing rope be tensioned by a minimum of 10 and maximum of 20 people. Another person tensions the balancing rope lengthways with the wooden rod. Once everyone has a loop in hand and the rope is tensioned well, one person can balance on it.

Material: polyester, wood. Rope dimensions: L 460 x W 7.5 cm. Load capacity: max. 80 kg.

Features:

- balancing rope for up to 22 people
- trains balance and dexterity
- strengthens team spirit

Adventure Tunnel

185373

Adventure Tunnel

For climbing through, swinging or sitting quietly in: The adventure tunnel can be hung from the ceiling or at any height using wall fixing systems, offering children lots of challenges.

Material: Polyester.

Dimensions: Ø 60 cm x L 2.5 m.

Features:

- can be hung from the ceiling
- for climbing, swinging or sitting quietly in

Swinging Fun

056889

Ball Swing

The ball swing consists of a fabric outer with a loop. Inside is a normal exercise ball. This means that the ball swing can also be used for sitting on and bouncing, as well as swinging, so it helps to develop muscle build-up, physical coordination and balance.

Material: outer made from robust outdoor fabric (100% polyester) with polypropylene strap. Washable at 30 °C. Dimensions: Ø approx. 65cm. Weight-bearing capacity: 100kg. Contents: ball outer, exercise ball, rope for hanging (115 - 200cm) and spring clip.

washable
30° C

Swinging Tire

Swinging and swaying on the swinging tire promotes building muscles and body coordination. The swinging tire is delivered with 1 rotational hook (contrary to figure) and 1 carabiner for the vertical suspension. Order at the same time for horizontal suspension on the three loops: 4 carabiners (item no. 644255) and 3 ropes (item no. 052450).

Material: robust outdoor fabric made from 100% polyester (light and dark blue), polypropylene webbing. Dimensions: Ø 76 cm, circumference approx. 43 cm, H approx. 19 cm. Load capacity: 70 kg.

Use only under adult supervision.

- A 055035 Swinging Tire
- B 052450 Rope, adjustable (115 - 200 cm)
- C 644255 Carabiner, 10.5 x 5.5 cm

Features:

- swinging fun for strengthening body sensation and coordination
- vertical or horizontal suspension possible
- appropriate rope available in 2 lengths

Swing Thing, at ground level:
children can always get in and
out by themselves

158536

Swing Thing

The different fixing options determine whether you can swing, bob or simply “hang around” in the Swing Thing. There is a choice of a 1, 2 or 3-point suspension system or it can be fixed at an angle. It can be a cubby hole cave, or a wobbly play area providing an unusual way to practice balancing and have fun at the same time. The surrounding net provides safety.

Material: Robust fabric made of 100% polyester; swing base consists of a foam-padded wooden panel. Dimensions: Edge length 1 x 1 x 1 m. Load capacity up to 100 kg. Included: 1 Swing Thing, 3 carabiners, and 1 extension rope (73 to 115 cm).

Features:

- both swing, seesaw and cuddly cave
- balance training fun
- can hold up to 100 kg

133570

Chilly Maxi

Ultra-comfortable hanging chair with removable padding. Ideal for swinging, resting and retreating.

Load capacity: 100 kg. Material: 100% polyester, robust and waterproof. Delivery includes carabiner, rotational hook and hanging rope. Seat dimensions: 45 x 45 cm. Total length: 200 cm.

Features:

- comfortable seat for relaxing and “hanging out”
- can easily be attached to the ceiling

157768

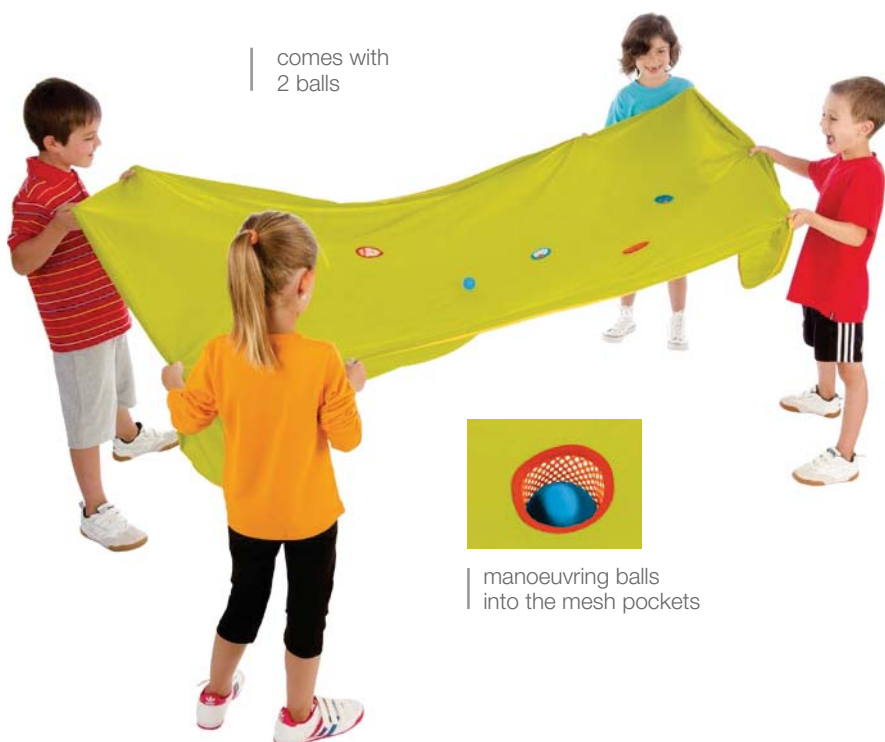

Dwarf Crawl Tunnel

Crawl through, hide, seclude yourself – the dwarf labyrinth consists of five different individual elements that offer children interesting and varied play opportunities. They can crawl through straight tunnels and progressively smaller tunnels as well as curved tunnels, withdraw into the tunnel lair for undisturbed playing or resting, and make contact with the outside world in several places via mesh screens. The individual elements can also be used by themselves and are easily connected to each other with hook and loop fasteners.

Contents: 5 pieces.
Green (L 140 x W 120 x H 110 cm),
yellow (L 144 cm, Ø 60 - 90 cm),
light gray (L 505 cm, Ø 60 cm),
light blue (L 120 cm, Ø 60 cm),
blue (H 72 cm, Ø 60 cm). inc.
carrier bag.
Material: 100% polyester.

Features:

- offers many play opportunities
- all elements can also be used individually
- can be quickly connected with hook and loop fasteners
- mesh screens for interaction with the outside world

comes with
2 balls

manoeuvring balls
into the mesh pockets

Golf Sheet Activity

In this game, the balls are holed out not with a golf club but rather through teamwork. The cloth has 4 holes in 2 sizes (Ø 6.5 cm and Ø 7.5 cm) and 2 border colors. The aim is to maneuver the two different sized balls (Ø 5 cm and Ø 6.2 cm) into the matching holes. It can also be used for parachute games. The enclosed instructions include many game ideas from easy to difficult. Includes 2 blue (Ø 5 cm) and 2 red balls (Ø 6.2 cm).

Material: durable outdoor fabric. Only wipe off surface. Dimensions: 143 x 253 cm.

Features:

- sophisticated dexterity game with balls of 2 different sizes
- encourages concentration, perseverance and movement coordination
- suitable as a group game for up to 8 players

368063

Tenpin Friends

These cute animal figures are larger than standard tenpins, and are soft and light. They are easy for little ones to pick up and play with. The bases are filled with granules, making them stable.

Contents: 6 pieces.

Dimensions: Tenpin Ø base approx. 15 cm, H approx. 50 cm. Material: Polyester, filling: Foam: Polypropylene, polyurethane, sand. Washable in the gentle cycle at 30 °C. Reshape after washing and leave to dry.

Features:

- light XXL tenpins for little children
- for indoors and outdoors
- quiet tenpin fun

056643

Soft Ball

This soft ball is very light and easy to grip, with a robust, elastic "elephant's skin" outer. It can also be washed and disinfected. Only suitable for indoor use.

Color: red.

Material: foam. Dimensions: Ø 16 cm.

Features:

- "elephant's skin" outer
- very easy to grip

Parachute Game

Swinging together is heaps of fun and great for making friends. The parachutes in vivid colors each have an opening in the middle and straps to hold on to. Includes handy polybag.

Material: nylon parachute material.
Wipe with a damp cloth to clean.

145542 large, Ø 610 cm (30 color fields),
16 holding straps

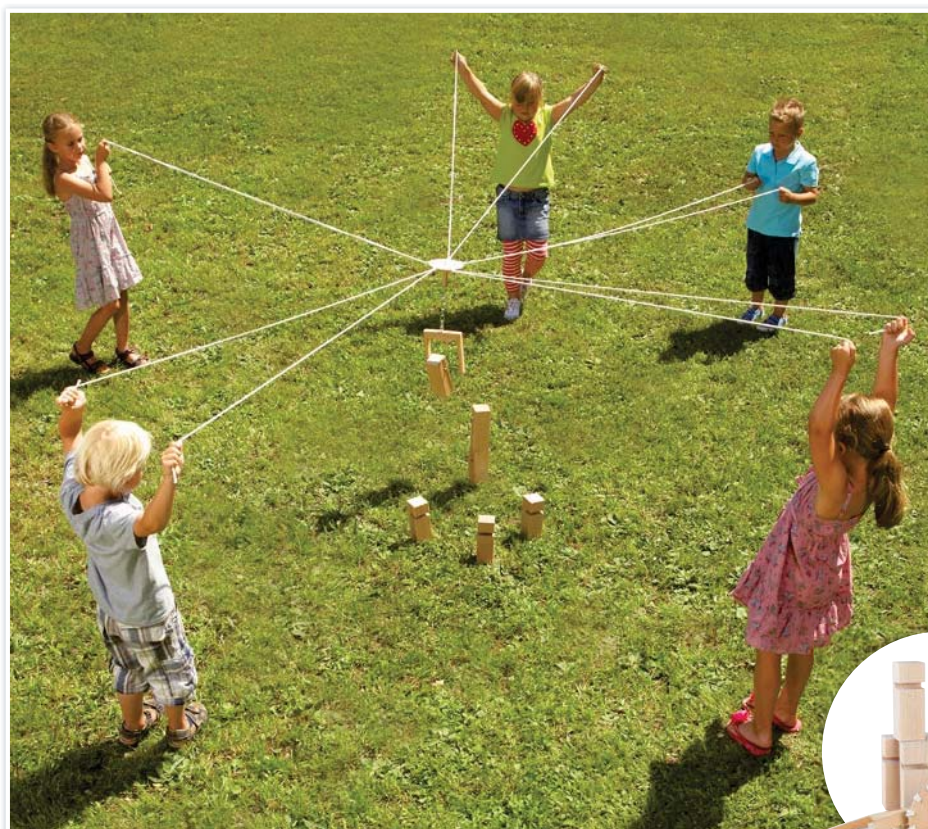

145539 small, Ø 310 cm (20 color fields),
12 holding straps

Features:

- in 2 sizes
- opening in the middle
- in a polybag

Build it up High Together!

134950

Cooperation Building Game

The aim of the game is to stack wooden blocks with the help of strings or disassemble the constructed tower. At the outset, the players form a circle, in the middle of which the wooden blocks are set up. Each player takes one or more strings in their hands and stretches them tightly in order to align the hanger in the middle of the strings. The team together now tries to clip the hanger into the groove of the wooden block, lift the block, and stack it into a wooden tower.

Contents: 6 hardwood blocks (17 x 6 x 6 cm), wooden plate with 12 strings 4 m each, hanger with metal rod. Type: Coordination game.

Features:

- cooperative building game for up to 24 players
- strengthens the sense of community
- promotes concentration, perseverance, and motor skills

051131

Rolanda The Walking Caterpillar

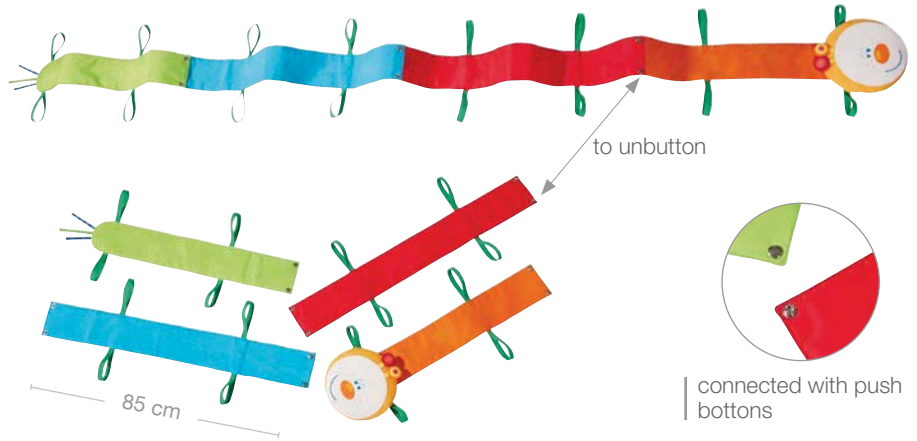

A total of up to 16 children can hold on to the loops of the moving caterpillar while walking. Rolanda consists of a head section and three other segments.

Contents: 4 pieces.

Material: robust fabric made of 100% polyester. Hand washable at 30 °C. Dimensions: lengths: middle section approx. 88 cm, head section approx. 78 cm, tail approx. 68 cm; width of each 12 cm; total length approx. 300 cm. Total weight 14 oz.

Features:

- 4-piece moving caterpillar with segments that can be unbuttoned
- suitable for walks with up to 16 children
- strengthens the sense of belonging to a group

Perception & Cognition

The senses are our window to the world. They enable us to perceive the abundant world around us. We then piece these experiences together to form our image of the world. Experiences that involve several senses at once are particularly memorable.

As they develop, children are constantly faced with new cognitive challenges. Babies learn primarily by observing and imitating. They try out the same things again and again. Around the age of three, children start to perceive the difference between themselves and the world around them; this is a stage of rapid cognitive development.

Magic Sparkling

Made in
Germany

384795

Magic Flowers

One shape, lots of colors, and even more arranging and stacking possibilities. The colorful blossoms with cool glitter effects can be stacked up into a tower, laid flat against each other, positioned three-dimensionally, or simply sorted by color. Since they only differ in color, they always fit perfect into, on top of, and next to each other, and can be combined into lots of patterns and three-dimensional shapes. This fosters hand-eye coordination and fine motor skills and trains shape and color differentiation and concentration.

Contents: 14 pieces. Blossoms made of solid beech wood in 7 colors. Type: arranging game.

Features:

- with glitter effect
- fosters visual perception
- supports hand motor skills and concentration

Rhombuses and triangles are gripped and placed in a hexagonal frame to create new patterns with varying levels of difficulty. Trains the pincer grasp, develops hand-eye coordination, hand motor skills, and color recognition. Ideal for use in therapy.

Contents: 47 pieces.

12 rhombuses, 24 triangles, 1 frame – all made from beech plywood, 10 double-sided template cards. Dimensions for comparison: Rhombus W 5 x H 8.5 cm.

Features:

- arranging items with grip
- includes template cards
- trains the pincer grasp, hand motor skills & color recognition

| 10 templates
| 47 pieces

"Marble Maze" Placing Game

Angles and straight sections can be used to create new mazes. Different balls need to be rolled through the maze from start to finish using a range of techniques. A versatile game that trains spatial and logical thinking, hand-eye coordination, hand and fine motor skills, and oral motor skills. Also ideal for use in speech therapy.

Contents: 54 pieces.

1 board (L 26.5 x W 26.5 x H 4 cm), 36 angled pieces (L 4 x W 4 x H 3 cm), 5 straight pieces (L 4 x W 4 x H 1.2 cm), 11 marbles (Ø 1.5 cm; 6 x cork, 2 x steel, 2 x wood, 1 x glass), 1 fabric bag, instructions. Material: Wood.

Features:

- extremely high quality
- can be combined to make an infinite number of different mazes
- marbles of 4 different materials
- trains hand-eye coordination, hand, fine, and oral motor skills
- can be played at different levels of difficulty

"Rainbow Mix" Magnetic Ball Set

Colorful, magnetic hemispheres for experimenting and combining. Comes with a fabric storage bag.

Contents: 11 pieces.

10 hemispheres in 10 colors, fabric bag. Material: Wood. Dimensions: Ball - Ø 46 mm.

Features:

- lots of different combinations
- comes with a fabric storage bag

 3+ years  1+ player  varies

Fröbel

379242

Fröbel "Seasons Tree"

Nature plays a key role in Friedrich Fröbel's pedagogy. This wooden season tree is a fantastic way of learning about the changing seasons. The attachments and decorations have simple yet appealing geometric shapes that can be matched to the seasons and attached to the seasons tree. This can inspire discussions and opportunities to learn about the seasons, natural, and geometric shapes.

Contents: 20 pieces.

Unassembled tree (approx. 35.5 x 28 cm), 12 round wooden decorations, 6 wooden attachments (2 circles, squares, and triangles), instructions.

Features:

- highly stimulating puzzle
- creates opportunities for discussion about how nature changes through the seasons
- the geometric shapes – circles, squares, and triangles – teach an understanding of aesthetics and geometry
- helps to develop fine motor skills, hand-eye coordination, color, shape, and theme sorting, and color differentiation

Listen Closely to the Sounds

Made in Germany

384801

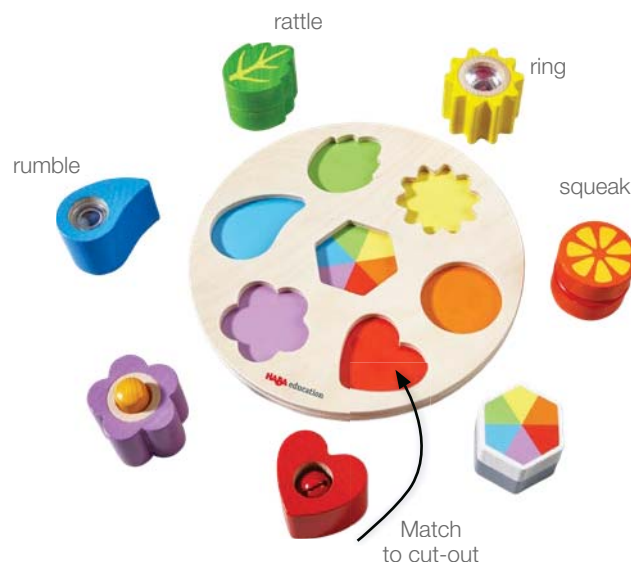

Magical Sounds Matching Game

Rattling, ringing, squeaking, clattering, jangling – the seven discovery blocks offer lots of sensory stimulation. They train the hearing and differentiation of noises and the recognition of colors and shapes. In addition, the blocks can be matched to the cut-outs on the wooden board and optical effects can be explored. Promotes color and shape differentiation and trains hand motor skills.

Contents: Wooden board, 7 discovery blocks.
Material: Wood. Dimensions: Wooden board – Ø 20 cm, discovery blocks ca. Ø 4.5 cm, H 4 cm.

Features:

- 7 discovery blocks with different functions
- high quality
- promotes color and shape differentiation and hand motor skills

353061

Lotto World of Flavors

The templates and cards feature fun, colorful images of fruit, vegetables, and favorite foods. Simply slide a template into the frame and place the cards on it. The practical, birchwood frame makes the game even more fun, as nothing can slide around or fall out of it.

Contents: 3 boards and 27 cards made from sturdy card, 1 frame made from birch plywood with an acrylic pane. Dimensions: 26.5 x 26.5 cm.

Features:

- with new, attractive illustrations
- slide-in frame with acrylic pane
- anti-slip notches
- helps to develop fine motor skills and concentration

3+ years 2 player Varies

384535

Matrix Mix

What belongs where? Keen observation skills are called for here, to arrange the 16 little motif cards into the Matrix Mix grid of the placing panel correctly. With 4 different placing panels, Matrix Mix can be played by up to 4 people at once. The players practice recognizing and naming sets of objects in different spatial arrangements and at the same time improve their perception of spatial relationships and spatial position.

Contents: 69 pieces.

Features:

- matching game for spatial orientation with 4 placing panels
- encourages perception of spatial position and spatial relationships
- trains concentration, attention and logical matching skills

3+ years 1-4 players 10 min

| 4 boards

207224

Cognifix

Card arranging game for training executive functions: in "Cognifix", players retrieve information stored in the short-term memory.

Contents: 157 pieces.

96 memory cards in 3 categories, 30 minus cards, 30 bonus chips, 1 set of instructions.
Type of game: concentration game.

Features:

- trains working memory, vocabulary and language ability
- teaches basic math
- suitable as an individual or group game

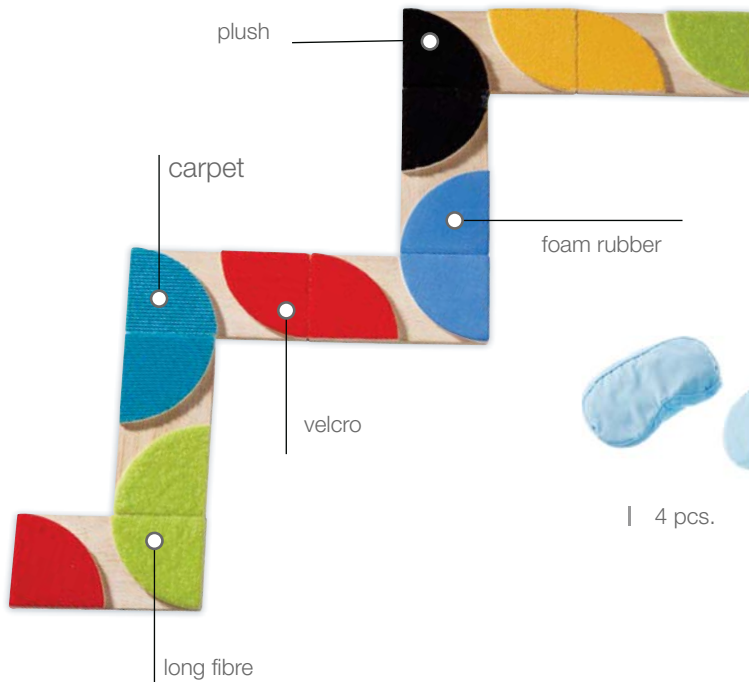

3+ years 1-4 player varies

7 different materials

28 domino tiles

384541

Touch Dominos

The players wear blindfolds and, to begin, feel the 7 different materials stuck to the dominos. Every player draws the same number of dominos and places them in their bag. To place a domino, players must feel the dominos already played and find a suitable domino in their bag.

Contents: 37 pieces.

28 birch plywood dominos (4.8 x 9.8 cm, 6 mm thick), 4 blue cotton bags (30 x 30 cm), 4 blindfolds, 1 set of instructions.

Features:

- dominoes game with various materials for touching
- with 4 cotton bags and 4 blindfolds
- also ideal for players with visual impairment

384800

Feel and Race

This game follows the familiar rules, but the game board has fewer fields and each player only has two figures. This makes the game much shorter! The play figures are easy to grip and can't fall down, thanks to the recessed fields. In addition, the heads of the play figures are shaped differently, so that players with impaired vision can recognize their players by touch.

Contents: 12 pieces. Board made from birch wood (25,5 x 25,5 cm), 8 counters Ø 2,5 x H 5,5), 2 dices (1 - 3 spots and 1 - 6 spots) and instructions.

Features:

- simplified Ludo game with reduced game length
- ideal for people with impaired fine motor skills and concentration problems
- play figures can be recognized by touch

Tactile Courses

111439

Foot Sensations Path

Here, your feet "see" when you walk along the path barefoot with your eyes blindfolded. All players can guess what material they can feel under their feet.

Contents: 20 pieces.

The sensory path consists of 10 frames, 4 cushions to fill yourself and 6 sensory plates: taffeta, long fibers, velour, terry cloth, velvet, net. The sensory cushions and plates are removable and, like the frames, are machine-washable at 30°C. Material: frame made of outdoor fabric in 100% polyester. Dimensions: 51.5 x 51.5 cm, cushions 47 x 47 cm.

Features:

- 10 non-slip frames made of robust outdoor fabric
- 6 sensory plates strengthen the sensorimotor system in the feet
- 4 cushions to fill yourself
- stimulates the sense of touch and strengthens a sense of community

| 10 frames

| 4 cushions for feeling experiments

| 6 feeling tiles

Flexible Sand-Water-Canvas

Great for games and experimenting with sand, water, paint and similar materials. People can splash, build and play to their heart's content on or in the cover, even indoors. Multiple covers, filled with different materials, create a sensory course for the feet.

Material: plastic. Color: blue.

111439 Large (W 80 x H 12 x D 120 cm)

111438 Small (W 80 x H 12 x D 80 cm)

Features:

- encourages varied sand and water games
- also suitable as a sensory course for the feet
- can be laid out flat or as a box with edges bound together

great for a tactile course

sorting wheel

feeling game

070387

Cup Carousel

Excellent for storage or for sensory games: the tumbler carousel has space for sensory material, colored pens, arrangement material, beads and much more. Turning. With 9 white, dishwasher-safe melamine tumblers.

Contents: 10 pieces.

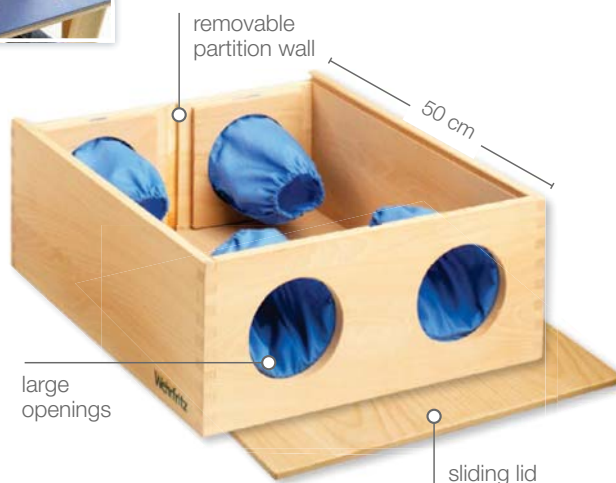

Material: real birch wood. Dimensions: wheel Ø 35 cm, H approx. 8.5 cm, hole Ø approx. 7 cm. Design differs from the illustration.

Features:

- turning carousel for playing or storage
- with 9 white, melamine tumblers
- very versatile

play from both sides

133969

Touch Box

Whether it's little stones, wooden balls or plastic pellets – this box makes touching and discovering really exciting. Especially useful: thanks to the removable middle wall, the hands can touch on the left and right, independently from each other. With removable sliding lid.

Content: 1 box

Material: box-jointed beech box.

Dimensions: 45 x 50 x 20 cm, holes Ø 12 cm lined with fabric.

Features:

- with large openings for the arms
- can be played with from both sides
- encourages finger motor skills

110651

Feel-it Box

Stone or chestnut? Only the hands can tell what's in the sensory box. The contents can be changed over and over. With sliding lid and stacking edge; opening made of fabric with elastic band.

Material: wood.

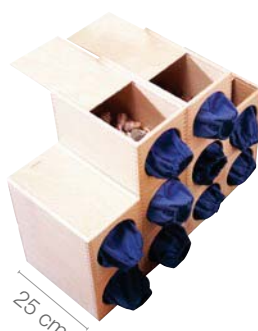

Dimensions: L 25 x W 15 x H 15 cm.

Features:

- can be filled in various ways
- stackable
- trains the sense of touch and feel

stackable

054853

Touch-and-Feel Bags

The various fillings enable different haptic experiences and muscular effort. 2 sacks in each color are filled with the same material.

Contents: 11 pieces.

10 fabric sacks in 5 colors, filled with cotton wadding, plastic granulate in 3 different grains and sand. Includes storage bag. Washable at 30°C. Dimensions: L 15 x W 10 cm.

Features:

- 10 sacks to knead, touch and throw
- fosters sensory perception and fine motor skills

| 2 x 5 bags

352149

Senses Balance Path

This balance path promises plenty of exciting fun and adventure. The different boards can be walked over barefoot. These are securely fixed into the towers: max. 2 in the small, 3 in the medium, and 4 in the large towers. Towers can be used both individually, and stacked together to make 2 or 3 levels.

Contents: 15 pieces.

8 stackable towers (2 large = base, 3 medium = middle, 3 small = top), 7 balancing boards with different surfaces (1 x neutral, 1 x chicken ladder, 1 x flat pyramid, 1 x cork, 1 x steel (reflective), 1 x artificial grass, 1 x pebbles), instructions. Material: Steel, stone, wood. Weight: 34 kg. Load capacity: 50 kg. Dimensions: Tower Ø 18, 22, 26 cm, H of each 8 cm; boards L 120 x W 12 cm, H 5 - 10 cm.

Features:

- sensorimotor balance and play obstacle course
- easy and quick to assemble and disassemble, and adapt to each child
- double feet of the sensory boards provide excellent stability and a secure fix
- different surface structures and materials help to develop tactile perception
- helps to develop feet sensory motor skills, sense of touch, body tension, attention skills, and balance

“Woodgoblin” Touch-and-Feel Game

Memory game for big and small to encourage concentration and memory skills. 12 different feeling materials are hidden on the heads of these easy-to-grip woodgoblin figures, and the matching material is under their hats. In a basic game and a memory game with 3 levels of difficulty, players help the little goblins to find and put on the right hat. Stimulates tactile and haptic perception.

Contents: 27 pieces.

Features:

- memory game with easy-to-grip goblin figures made from robust wood
- with 12 different feeling surfaces in 12 colors
- 3 levels of difficulty ensure variety

3+ years 2-4 player 5-20 min

For All Five Senses

130910 Quisensi

The varied games collection encourages and requires tactile, visual, auditory, olfactory and gustatory sensory impressions. The action cards and materials can be chosen individually, depending on the age, number and skills of the players, length of the game required, intended learning content and development objectives. The instructions contain the rules of the game, tasks and game suggestions.

Contents: 212 pieces.

99 action cards, 9 shape pairs in wood, 12 tin cans, 10 sensory cylinders (5 pairs with different materials), 1 pack of glass marbles, 10 wooden discs, 1 sensory cloth, 2 large, 5 medium, 10 small sensory sacks, 10 each red, yellow, green and blue colored sticks, 1 play figure, 1 hour-glass, 2 dice – all in a robust wooden box with a sliding lid.

Features:

- extensive playing set with more than 200 parts in wooden box
- level of difficulty, length of the game and tasks can be adjusted individually
- trains sensory perception in a variety of ways
- fosters attention and concentration

3+ years 1+ player 10-15 min

Learning Concepts

Humans have a natural inquisitiveness about the world. For children, everything they come across is fundamentally interesting and exciting. Early Years education is about capturing and building on children's curiosity and enthusiasm for learning new things. Concepts and resources developed with experts in the field are used to teach children the fundamentals about shapes, surfaces, patterns, and numbers. A wide range of games develop their working memory, cognitive flexibility, and impulse control. Children are then ready for learning and for life, as they will need these core skills in many different situations.

Development Path

of cognitive and mathematical learning

Children are born learners. They are already equipped with cognitive skills when they are born – today we use the terms “competent” and “active infants”. In this respect, research’s view of Piaget’s levels of cognitive development has changed. But one of his findings is valid: cognitive development is not a passive maturation process. Very young children are already actively making the world that surrounds them their own. Children are dependent on contact with other children and caring adults. Thus, learning takes place in a common process of construction. Cognitive development looks at mental structures and processes. It is about the development of thinking, problem-solving, and memory as well as deciding and judging. These processes do not appear immediately, but in certain actions or

on the basis of certain “errors in reasoning”. Children’s cognitive and mathematical abilities also vary with context. Thus, some (arithmetical) tasks succeed better in everyday and familiar surroundings than in school settings.

We would like to thank Prof. Dr. Reißmann from Erfurt University of Applied Sciences, professor of “Educational Sciences, Education, and Teaching Children” for her professional support. Support also by: Fröhlich-Gildhoff; Mischo; Castello 2016; Merz; Schmidt 2007; Siegler; DeLoache; Eisenberg 2005; Reiss et al. 2008.

“Understanding the World Through Grasping”

Level 1

Sensumotoric stage (Piaget)

General cognitive development

- Perception-based classification and formation of categories
- Development of object and depth perception
- Forming and remembering simple contexts

- Action-bound dealing with the environment
- Development of object permanence (child recognizes that objects exist, even if they do not see them)
- Spontaneous actions (e.g. sucking, gripping)
- Development of schemes (e.g. suction scheme, gripping scheme)

Development of mathematical skills

- Physical and mathematical core competences are available at an early stage or from birth (e.g. solid materials cannot be “penetrated” by others, rudimentary ideas of quantity)

“Knowing Oneself and Others”

Level 2

Sensumotoric stage (Piaget)

General cognitive development

- More variable and complex exploration and discovery
- Comprehending and imitating simple action patterns
- Initial understanding of cause and effect, of resource/purpose relationships
- As-if games
- Understanding one’s self
- Increase in observational learning of entire courses of action
- Object permanence even with complicated and sequential search actions
- Classification of objects on the basis of the overall shape

Development of mathematical skills

- Simultaneous comprehension of 2 to 3 elements at a glance
- Scheme of comparison (equal – not equal; more – less)

"The Way I Think,
Others Think, Too"

"I'll Remember
That"

Level 3

Preoperational stage (Piaget)
(approx. 3-6 years)

General cognitive development

- General knowledge of abstract facts
- Better understanding of causal relationships (in everyday, child-appropriate problems)
- Building "dense" knowledge networks in selected areas of interest through suggestions
- Ego-centric speaking (controlling thinking and action through one's own language)
- Social role playing
- Enhancement of classification skill
- Beginning understanding of class hierarchies (e.g. plant – tree – maple)

Development of mathematical skills

- Simultaneous comprehension of up to 4 elements at a glance
- Decomposition of specific quantities into partial quantities
- Pro-quantitative schemes (e.g. total quantity can be divided into partial quantities among different types)
- Reciting the series of number words from any number onwards
- Adding up two specific quantities by continuing counting
- Cardinal concept (numbers as quantities)
- Initial calculation strategies
- One-to-one assignment of number words to objects, later assignment of a quantity to a number
- Cardinal understanding of numbers (counting specific perceptible objects from the number 1 onwards)
- Schemes of multiplication and reducing
- Numbers are counting numbers

Level 4

Concrete preoperational stage (Piaget)
(approx. 7-12 years)

General cognitive development

- Capable of mental operations
- Insight into quantities, masses, and numbers
- Understanding of the scientific causal concept
- Improvement of verbal memory performance
- Application of memory strategies (e.g. internal repetition, sorting by topics or elaboration, i.e. linking ideas/experiences with the thing to be remembered)
- Development of procedural metacognition (planning, control, and monitoring of memory processes)

Development of mathematical skills

- Transition from counting specific objects to mental counting, where the children imagine numbers as quantities
- Dividing imaginary quantities into partial quantities
- Further development of the number range
- Counting of larger summands
- Dividing a task into two easier tasks
- Different levels of competence from the knowledge of adding (in the number range up to 20) and the basics of multiplication up to context-free calculation in the number range up to 100, half-written calculation in the number range up to 1000, and the application of several basic arithmetic operations in complex situations

Willy's World of Numbers

Age 3+

Use our Learning Concepts developed with experts in the field to teach children the fundamentals about shapes, numbers and patterns and develop their working memory, cognitive flexibility, and impulse

control. Children are then ready for learning ... and for life, as they will need these core skills in many different situations!

Willy's Number Stacking Tower

384536

Willy's Number Stacking Tower

Willy's Number Stacking Tower is a colorful stacking set comprising 10 wooden cubes of different sizes. They can be stacked on top of each other to make a tower, sorted, or lined up next to each other. The fun with numbers and quantities is different every time. Four game ideas for the cubes with lots of versions help with learning numbers and a feeling for quantities. The geometric puzzle shapes of the stacking tower also make it both educational and fun.

Contents: 11 pieces.

10 stacking cubes (4 sides printed, 1 side with geometric puzzle pieces), 1 bag, instructions.

Features:

- introduces to basic addition and number partitioning
- fosters identification and naming of colors
- conveniently stored
- stackable on top of or inside one another

Willy's Number Train

The beautifully designed wooden train comprises the locomotive and 11 carriages, representing the numbers from 0-10. 1-10 colorful wooden discs can be placed on them and carried around. It's clear that NOTHING can be placed on the carriage representing zero. The dice spots displayed on each carriage and attachable flags with the corresponding numbers illustrate the number picture and the quantities. The carriages can be joined together and run on stable wheels and axles. In the cab of the locomotive, there is space for the two wooden figures: the number fairy Forget-Me-Not and the goblin Muddle! All aboard, the journey to Numberland is setting off! Cheerful game ideas and short accompanying stories promote understanding of numbers and quantities.

Contents: 129 pieces.

1 locomotive, 11 carriages, 2 wooden figures: Number fairy Forget-Me-Not and goblin Muddle! All aboard, the journey to Numberland is setting off! Cheerful game ideas and short accompanying stories promote understanding of numbers and quantities.

Dimensions: Carriage 13 cm; complete train 172 cm.

Features:

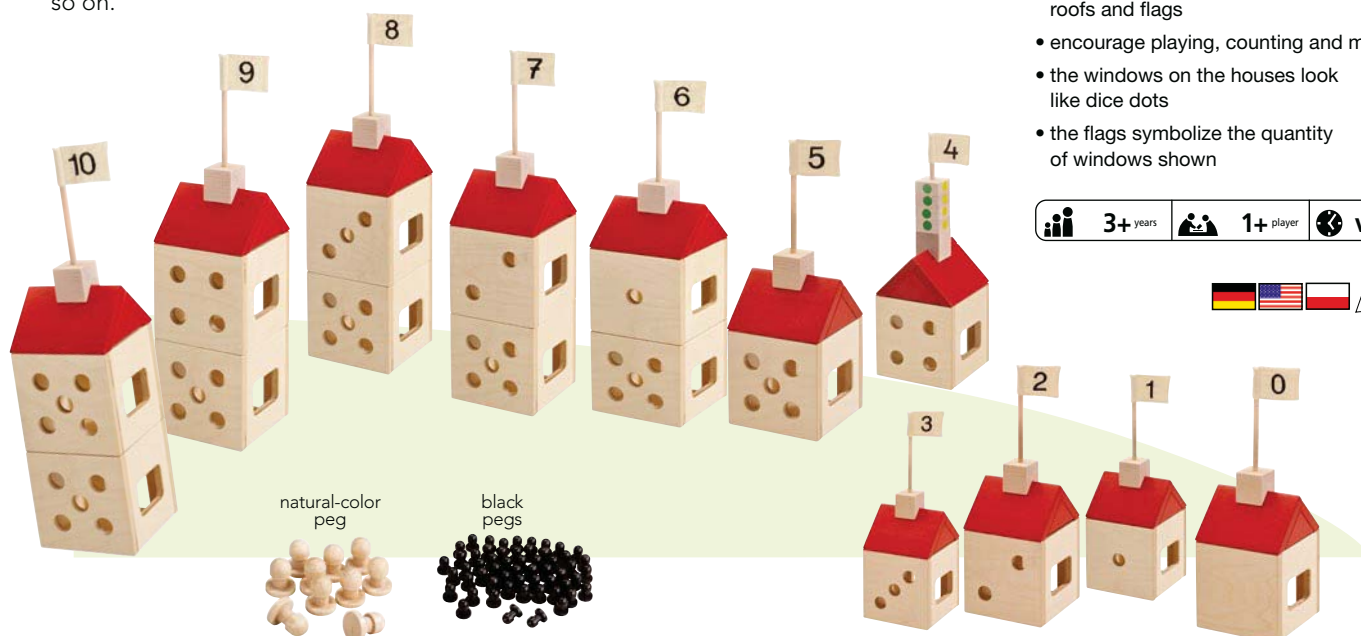

- sturdy wooden train over 1,7 meter long
- can be combined with almost all Numberland products
- promotes understanding of numbers and quantities
- first arithmetic in the number range up to 10

The number houses

The windows on the number houses are grouped like the pips on a dice and represent the amount aspect. The windows can be closed or opened again with the wooden pegs. The flags bring order to the Land of Numbers. In the house of the number 1, everything can be found once, in the house of the number 2 twice and so on.

3 turns into 2, when I take one away
cover window with a natural-color peg)

A stable for 1 horse
or a garage for 1 car
(without decoration)

The "roof garden":
5 marbles stay put

The house of the 0 doesn't have holes

133931

Willy's Number Houses, Set

Illustrate the numbers from 1 to 10. 15 houses with 1 to 5 holes for the plugs and 1 house with no hole for zero. The numbers 6 to 10 are shown by stacking or placing two houses next to each other (5 + 1, 5 + 2, 5 + 3 etc.) Note: The numbers after 6 can also be depicted as duplexes if you order 5 additional roofs.

Contents: 114 pieces.

Material: wood, all edges are rounded; flags made of fabric.

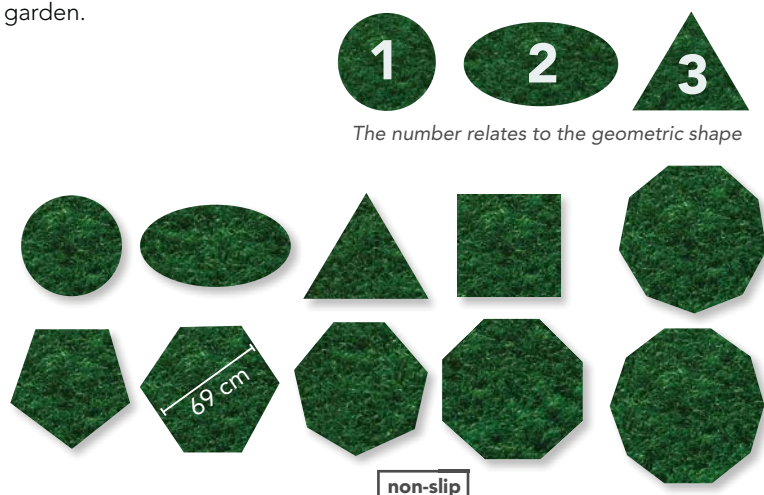

Features:

- large set consisting of houses, roofs and flags
- encourage playing, counting and math
- the windows on the houses look like dice dots
- the flags symbolize the quantity of windows shown

The number gardens

The number gardens form the basis for Willy's World of Numbers. They represent the numbers in form of geometric shapes: the 3 as triangle, the 4 as square etc. Each number from 1 to 10 has its own number garden.

The number relates to the geometric shape

133934

Willy's Number Gardens

10 geometric shapes where the number of corners corresponds to the numbers 1 – 10: a triangle stands for 3, a rectangle for 4. The larger the number, the larger the garden.

Contents: 10 pieces.

Material: green felt lawn with non-slip bottom.
Dimensions for comparison: circle Ø 75 cm,
oval 100 x 60 cm.

Features:

- learning set comprising various geometric shapes
- made of high-quality felt
- with non-slip bottom for standing or jumping on

350179

Willy's Finger Puppets 1-10

The beautifully designed, soft finger puppets are a playful way for preschool and elementary school children to learn about cardinal numbers, and enable a holistic access to the world of math. Each finger puppet is double-sided, with the front showing the numbers 1 to 10 as digits, and the back showing the matching quantity.

Contents: 11 pieces. Material: Polyester. Washable in the gentle cycle at 30 °C. Dimensions for comparison: Number 1 W 4.1 x H 8.1 cm; number 10 W 8 x H 7 cm.

Features:

- playful introduction to the numbers up to 10
- emotional access to math: makes numbers vivid and tangible
- creative linking of numbers and quantities shown on each finger puppet
- comes with a fabric storage bag
- helps to develop: hand-eye coordination, quantity and number association, basic mathematical skills

133929

Willy's Number Animals

The soft number animals made of fabric provide intensive, emotional access to basic numbers. Each animal has features corresponding to its number.

Contents: 11 pieces.

Material: Foam, cover made from jersey fabric. Washable at 30 °C. Dimensions: e.g. number animal "1" approx. 38 cm tall, Ø approx. 6.5 cm.

Features:

- 11 quirky number animals (0 to 10) in different colors and patterns
- encourage basic mathematical understanding and language ability

133930

Willy's Wooden Numbers 0-10

The numbers symbolize quantities through corresponding features: on the number 7, for example, there are 7 hearts, and the number 4 has 4 braids.

Contents: 11 pieces.

11 numbers with corresponding rods and stands made of wood. Dimensions: height approx. 14 cm, wooden foot 10 x 10 cm.

Features:

- 11 colorfully illustrated wooden numbers (0 to 10)
- teach the numbers up to 10 in an entertaining way
- combine with the number world houses (item no. 133931)

The Number Path

Willy's number path connects the World of Numbers with kinesthetic experiences. It makes it possible to experience the sequence of numbers (= order aspect) through movement.

133074

Willy's Number Path 0-20

The non-slip number tiles are extra-large, so they can be stepped or jumped on easily – even by two at a time. They have the numbers from 0 to 20 printed on them. For better orientation, the numbers 0, 5, 10, 15 and 20 are in different colors.

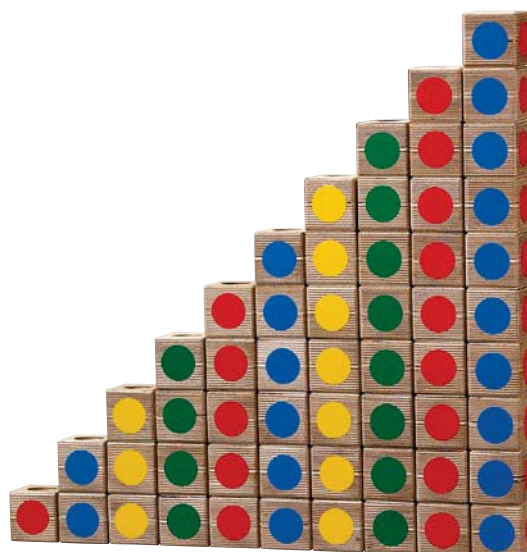

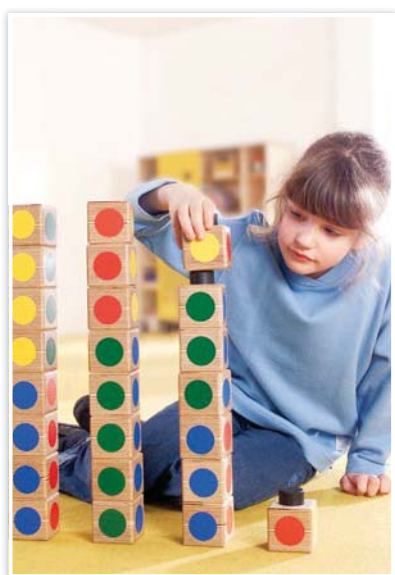

Contents: 21 pieces.

Material: felt, non-slip bottom.

Dimensions: 29 x 29 cm.

Features:

- extra-large tiles with non-slip bottom
- brings the sequence of numbers up to 20 to life through movement
- connects the world of numbers with kinesthetic experiences

133911

Willy's Number Towers 1-10

Introduction to the world of numbers up to 10. The wooden cubes have spots printed on them in red, yellow, green and blue, as well as a drill hole on 2 sides for the plugs. They are coated in saliva-resistant paint and have rounded edges. Includes instructions with ideas for games and exercises.

Contents: 110 pieces.

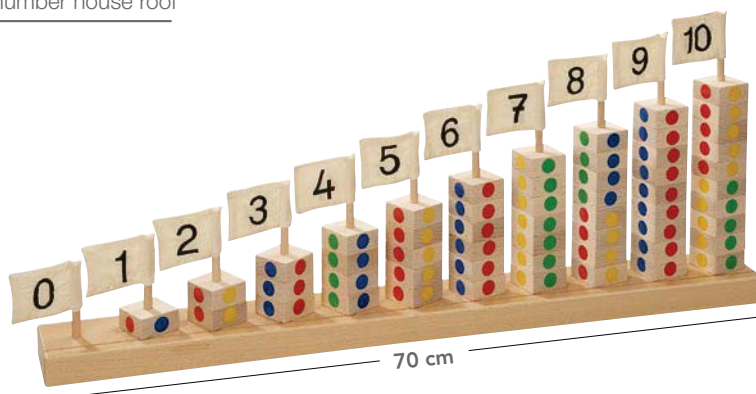

Material: multiplex birch; plugs made of beech, painted black. Dimensions: 6 x 6 x 6 cm; plugs Ø 3.4 cm. Set with 55 cubes and 55 plugs.

Features:

- creative building fun with towers made of robust wooden cubes and plugs
- the large wooden cubes are easy to hold
- teach understanding of quantities and numbers

stack onto
number house roof

133932

Willy's World of Numbers Towers 0 - 10

The wooden discs have spots printed on them in red, yellow, green and blue and can be arranged on the wooden rods or the wooden strip.

Contents: 79 pieces.

Pegging strip (75 cm), 11 rods in 11 lengths, 55 discs (4 x 4 x 2 cm), 11 flags.

Features:

- entertaining pegging game for learning the numbers from 0 – 10
- train quantity differentiation and matching
- foster concentration and attention

158551

Willy's Beginner Set

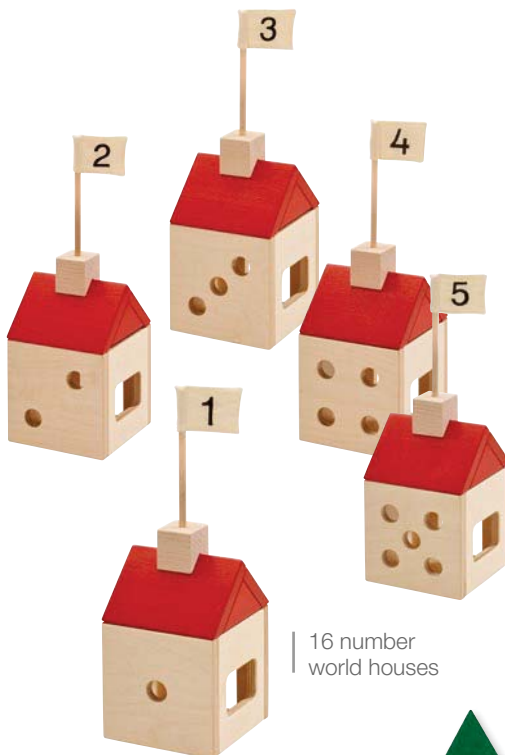

The large, well-designed set includes houses, number animals, and geometric shapes that represent the numbers 1-10 and enable children to access mathematics using their emotions. The houses have between 0 and 5 holes, symbolizing the numbers up to 5. Higher numbers are represented by creating piles or putting figures next to each other. The soft number animals have features that correspond to the number they represent. The 10 geometric felt shapes have a non-slip base and have different numbers of corners, depending on the number they represent.

Contents: 135 pieces.

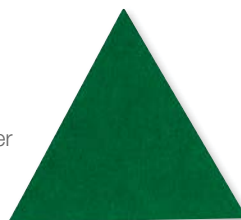

16 number world houses (13 x 13 x 13 cm; 11 roofs (7 cm high), chimneys, flags; 55 black poles, 10 natural poles; 11 number animals (for comparison: 'No 1' H ca. 38 cm, Ø ca. 6.5 cm), 10 number gardens (for comparison: circle Ø 75 cm, oval 100 x 60 cm). Material: Houses made of wood, all edges are rounded, coated in saliva-resistant paint; flags made of fabric, number animals made of foam with terry cloth cover, washable at 30 °C; number gardens made of green felt.

Features:

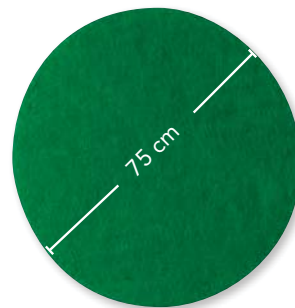

- large, good value, well-designed basic set
- facilitates access to mathematics
- helps to develop basic mathematical understanding
- encourages playing, counting, and calculating

16 number world houses

10 number gardens

11 number animals

067460

Willy's Number Carpet

Number carpet for learning the basic numbers. By showing the number gardens, it invites children to slip into the role of numbers, to sit down or to fill the number gardens with objects corresponding to the number.

Material: 100% polyamide, cut loop pile (H 7 mm), with non-slip back, bound edge.
Dimensions: Ø 3 m.

Features:

- supports learning of the numbers up to 10
- non-slip carpet with bound edge
- combines with the "Willy's number world" concept

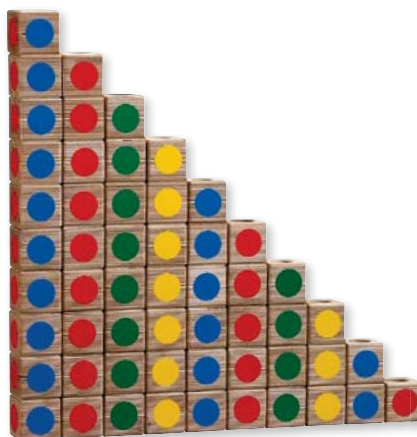

Ø 3 m

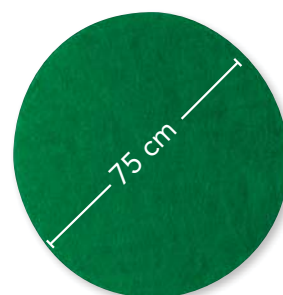

Playfully Trains Numeracy & Communication

16 number houses

55 cubes + 55 pegs

10 number gardens

number path 0 - 20

wooden numbers 0 - 10

133943

Willy's Basic Set

The set contains: 16 Willy's Number World houses, Willy's number path 0 - 20, 55 Willy's number towers, Willy's number gardens 1 - 10, and Willy's wooden numbers 0 - 10. Free of charge: the "Fairy & goblin" figure set.

Contents: 278 pieces.

Features:

- substantial set to apply the learning concept
- houses, towers, gardens, and wooden numbers from "Willy's Number World"
- free of charge: Fairy & goblin

The Mini World of Numbers

mini-number houses

133523

Willy's Mini Number Houses, Set

Consisting of the mini number houses (15 houses, fabric flags with the numbers 1 to 10, wooden rods to plug in the holes), the mini-number path (number path tiles 1 to 20; gray felt, 5 mm thick, 10, 15, 20 blue, otherwise black) and the mini-number gardens 1 to 10 (green felt, 5 mm thick).

Contents: 108 pieces.

Dimensions: number path tiles 3.5 x 5 cm, number garden for 1: Ø 15.5 cm, number houses (without flags): W 7 x H 9.5 x D 6 cm.

Features:

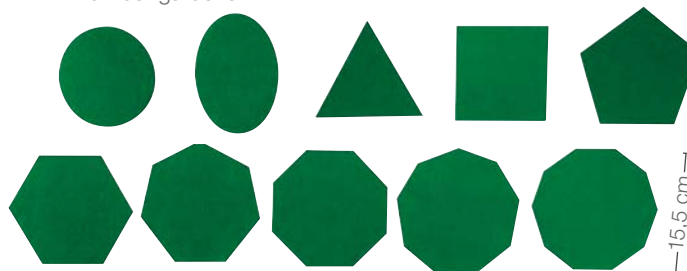

- illustrative game material for early math exercises
- encourages concentration and memory

mini-number path

mini-number gardens

114559

Number gnomes

Goblin Kuddelmuddel has buried valuable treasure in Numberland. The number gnomes go counting and feeling and with a lot of imagination on a treasure hunt. But the cheeky gnome is not far away and gets things going.

Contents: 91 pieces.

Type: number learning game.

Features:

- attractively illustrated number learning game
- game material stimulates imagination, haptics, and cognitive thinking
- ideal as a supplement to "Willy's Number World"

LEARN ABOUT THE DIGITAL WORLD

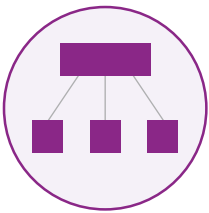

ON THE ROAD TO CODE

... we introduce children to the exciting digital world. We teach them the fundamental skills needed to understand digital media and express their own creativity. Our DigitalStarter products are designed for children's everyday life and enable them to learn

about abstract topics through play. We focus on analog products which are fun to train logic, creativity, and abstraction skills.

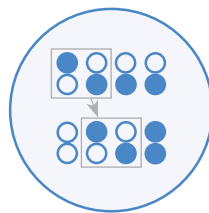

COMPUTATIONAL THINKING

is the ability to recognize problems, apply abstraction skills, and identify the individual steps needed to solve them. The solution is intended to be implemented by both people and computers.

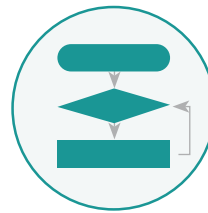

SEGMENTATION

A complicated task is separated out into disparate, solvable problems. The principle is applied to both everyday tasks and when creating an algorithm.

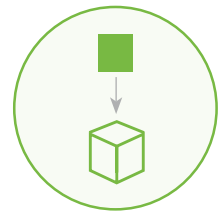

PATTERN RECOGNITION

Repetitions and regularities occurring in a lot of information are recognized. The features common to all objects in a category are identified and differentiated from the rest.

ALGORITHM

A problem or a whole group of problems can be solved by defining the separate stages of a solution, their order, and any dependencies. The algorithm indicates the precise course of action to solve a defined problem.

ABSTRACTION

The essential facts in a large group of information are identified. Non-essential details can thus be ignored, simplifying the problem. General solution strategies can be developed using the principles of abstraction.

BASIC SKILL

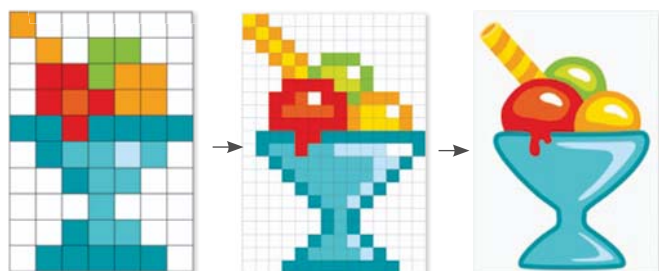

SEGMENTATION

” DigitalStarter – these are innovative games designed for us children, introducing us to how computers work, in a totally analog way!

templates of various pixel intensity

Made in
Germany

384804

Digital Starter: Arranging Game Pixel

Can computers actually paint? Of course not! But then how do the colorful images get on the screen? Cody and Pixi know the answer: the twins show children what pixels are and how a code can be used to create a large image from individual color information. On the screen or in the arranging frame – the principle is the same! In three arranging games that build on one another, children learn the basics of digital image construction and unravel the corresponding codes. Can the players recognize images in pixelated form as well and crack the binary codes? The aim of the game is to decode the information and place the color tiles in the right place!

Contents: 1299 pieces

232 large pixel building blocks, 1045 small pixel building blocks,
1 arranging frame, 20 template cards, 1 set of instructions. Material: real
wood, plywood, paper. Dimensions: arranging frame: 22,5 x 30 x 1,2 cm.

Features:

- basics of digital image construction and codes
- concentration and logical thinking, fine motor skills

 5+ years  1+ player  varies

BASIC SKILL

ALGORITHM

“Pixels, codes, and algorithms: deciphering is heaps of fun for Pixi and me! But of course a portion of logic, concentration, and ingenuity is also required. Then the digital world is not so complicated after all!”

384540

Digital Starter: Algorithm

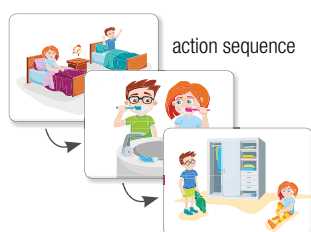

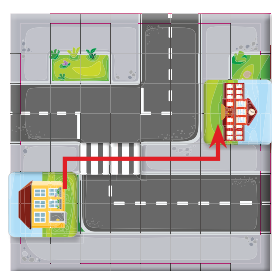

What does our morning routine have to do with an algorithm? Cody and Pixi can explain! The two siblings show players that all action sequences – from getting out of bed, to getting dressed, to running off to preschool or school – are carried out according to a logical pattern, just like with a computer. In three games that build on one another, the children create an understandable sequence for the whole morning. Who can create their own algorithm with the individual action sequences? Players also have to consider the conditions in the form of weather maps and then develop a code for the path to the destination!

Contents: 1 game board, 40 picture cards, 2 Cody and Pixi figures.
Material: carton, cardboard, wood. Dimensions: 26 x 26 cm.

Features:

- understanding algorithms
- concentration and logical thinking, planning of action sequences, language, spatial awareness

 5+ years  1+ player  varies

with this code, Cody and Pixi go to school.

Made in
Germany

384805

Digital Starter: Search & Sort

Have you ever had to search for something in an untidy children's room? Cody and Pixi know the problem! Together with the players, the siblings discover how computers, unlike us humans, sort things and find them again in response to a search command. The children try out different ways of sorting with various things from their everyday life and understand the basics of simple search algorithms and a binary code. Who can keep track of everything while searching and sorting and manage to solve the tasks by assigning, comparing, and strategic search sequences, as well as finding the item they are searching for as quickly as a computer?

Contents: 38 pieces.

6 weight cylinders, 1 set of scales, 6 color tablets, 6 animal figures (mouse, duck, beaver, cat, dog, horse), 2 fabric bags, 15 sock cards, 1 binary search tree, 1 set of instructions. Material: carton, cardboard, wood.
Dimensions: scale B 35 x H 4,5 cm, cylinders H 8 cm Ø 5 cm, dog B 1,4 x L 4,5 x H 4 cm.

Features:

- first experimentation with various searching and sorting algorithms
- concentration and logical thinking, fine motor skills, action planning

 5+ years  2+ player  varies

BASIC SKILL

PATTERN RECOGNITION

”
A code is always a secret! It has to be deciphered – and that’s exactly what a computer does!
For a computer, codes are certain patterns that a programmer has specified and that the computer follows.

Made in Germany

384806

Digital Starter: Coding Architect

Pixi has built a great castle out of colorful blocks. But not only that: she deciphered a mysterious code and worked through one step after the other – like a computer following an algorithm! The codes here do not consist of complicated text commands, but show colored building blocks and their coordinates. So the right building is created very easily! Read the coordinate plan, decipher the arranging codes, and then develop your own code for your building and become a Coding Architect! The three degrees of difficulty will have coding beginners and real pixel pros pondering!

Contents: 31 wooden building blocks, 1 coordinate plan, 30 template cards, 179 coding cards, 1 arranging tray, 6 polybags, 1 set of instructions. Material: carton, cardboard, wood. Dimensions arranging tray: 26 x 26 x 2,5 cm.

Features:

- deciphering and developing codes
- concentration and logical thinking
- spatial awareness and fine motor skills

 5+ years  2+ player  Varies

Made in Germany

385615

Digital Starter: Arranging Game Coding Pixel

Deciphering mysterious codes – this isn’t just fun for Cody and Pixi! The siblings show the players how a computer converts codes into color images on the screen. Different codes are deciphered row by row and the pixels are placed in the right place. The children then become programmers themselves and develop their own codes! Who can keep track of the tricky codes and place the right image on the colored pixels? The three degrees of difficulty will have coding beginners and real pixel experts pondering!

Contents: 100 pieces. 100 dice with 4 colored, 1 white, and 1 black side, 1 arranging frame, 18 code cards, 1 set of instructions. Material: real wood, plywood, cardboard. Dimensions arranging frame: 32,9 x 32,9 x 6,3 cm.

Features:

- basics of digital image construction and codes
- concentration and logical thinking
- fine motor skills

 4+ years  1+ player  varies

367571

Digital Starter: Coding Labyrinth

What is the shortest route for the robot to get to their goal and still carry out specific tasks along the way? Three games encourage children to play the part of the robot dog "WiFi" and its programmer, and navigate through the tricky maze using all their senses. To do this, they "translate" the tasks into simple codes, helping them to develop a deeper understanding of how computers, programming codes, and "programming loops" work.

Contents: 17 bases, 18 template cards, 1 small coding card, 61 large coding cards, 1 dog + wooden base card, 1 ball card, 1 bone card, 1 board, 1 set of instructions.

Features:

- getting to know how a computer works and the basic principles of computational thinking through playing
- guaranteed puzzle fun developing simple codes
- high-quality materials that encourages children to try things out

 **5+** years  **2** player  **Varies**

367487

Digital Starter: Machine Learning

Computers can learn, too, and this exciting placing game helps children to learn how they do it. Playing the part of the robot dog, WiFi, they have to find out which gift parcels contain a delicious bone. To do this, they check some of the parcels and work out the rule that tells them where the remaining bones are hidden. It's a fun way to learn about the complex world of algorithms and artificial intelligence. High-quality materials and varying levels of difficulty ensure the game is never boring.

Contents: 18 wooden gift parcels, 1 wooden robot dog figure (WiFi), 18 wooden dog bones, 16 templates, 16 feature sheets, 1 set of instructions.

Features:

- getting to know through play how a computer works and the basic principles of computational thinking
- guaranteed puzzle fun discovering and applying search algorithms
- high-quality materials that encourages children to try things out

SOCIAL-EMOTIONAL SKILLS

Being with other people produces strong feelings: arguing, reconciling, being angry, laughing together, crying, consoling, being happy... we humans, and the community in which live, are shaped by emotions. Children, however, have to learn how people express different emotions, what these emotions mean, and how to manage them.

Social-emotional skills are key to growing into a happy adult. Children need help and support on this journey in daycare, nursery, and pre-school. Social and emotional interactions play a big part in these settings, and so encouraging the development of social-emotional skills is a key aspect of education in early childhood development.

Our educational games range, Feelix & Fay, helps educators to create space for emotions, approach them directly, and address different emotions with each individual as well as with a group. The materials have been developed by experts from academia and in the field to help children develop strategies to manage their emotions, and those of others. The educational games range, Feelix & Fay, uses empathetic, imaginative play to develop different aspects of social and emotional skills.

WHO ARE FEELIX & FAY?

Feelix & Fay are popular characters in the educational games range. Before the game is set out in the instructions, there are short stories that introduce the topic. This enables educators to approach children's emotions and tackle them appropriately. Feelix is a figure the children can identify with as, just like them, he has lots of different feelings. His best friend, Fay, a red panda, is always there for him. She comforts him with fluffy cuddles or provides positive encouragement. They always find a solution, together.

Children acquire social-emotional skills gradually. The four subcategories – emotional knowledge and expression, emotional regulation, empathy, and conflict and cooperation – are all closely connected. Each ability is equally important in developing the ability to act appropriately and form appropriate social relationships.

Emotional regulation

Emotional regulation means having appropriate control of one's emotions. Children learn to identify that they are experiencing a strong feeling, but they must not let themselves be overwhelmed by it. They practice impulse control. The objective is that, instead of acting uncontrollably or bursting into tears, children are able to continue discussing the issue and managing their own position.

Conflict & cooperation

When different interests collide, there is often conflict. What is the best way of managing different needs? This is what conflict & cooperation is about. To help develop social-emotional skills, the aim is to find a peaceful resolution to a conflict. Children learn to not only put forward their interests, but also to subordinate them. To manage conflicts peacefully, emotional knowledge & expression, emotional regulation, and empathy also play an important role.

Empathy

Empathy means having a rational and emotional understanding of the perspectives of others, and then adapting your own behavior accordingly. Why is someone expressing this feeling? What might have happened? What would I feel if I were in their place? These thoughts are the foundation of empathy. Empathy is therefore closely connected to emotional knowledge and expression.

Emotional knowledge & expression

Knowing, identifying, and naming feelings and their characteristics is at the heart of emotional knowledge and expression. Children know the causes of feelings, and can identify which emotions occur in which situations. This makes them better at assessing social situations, and they also learn to read other people's expressions of their feelings. They also identify their own feelings, and learn how to express them.

"Mixed Emotions" Wooden Balls

This game enables players to deal with their feelings and improve their emotional and social skills. The 6 wooden balls are printed with basic facial expressions: Fear, anger, disgust, sadness, surprise, and joy. They can be separated in the middle and re-assembled, creating new emotions: a "mix of emotions", that the players discuss and interpret, sharing their own experiences.

Contents: 12 pieces.

12 semi-circular balls (Ø 46 mm), printed, 1 base (18 x 14 cm), instructions.

Feelix & Fay

Made in
Germany

345666

Feelix & Fay – Emotions Star

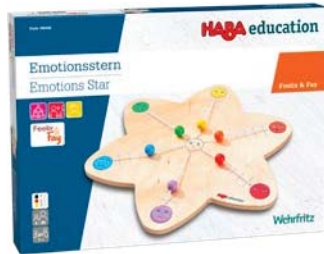

The Emotions Star helps children to understand and express uncertain or contradictory feelings. Each arm of the star represents an emotion, and the movable balls on the arm show the intensity of the feeling.

Material: Birch panel, beech, 9 mm thick.
Dimensions: 26.27 x 29.62 cm.

Features:

- ideal for circle time or project weeks
- highly stimulating
- includes instructions with game ideas
- helps to develop verbal expression of emotions, communication, vocabulary, empathy, conflict resolution, and fine motor skills

4+ years 1+ player 5-10 min

Made in
Germany

345609

Feelix & Fay – Emotions Barometer

The Emotions Barometer is filled with balls until the smiley face next to the ball at the top shows the relevant emotion. This helps children to learn to reflect on their feelings and talk about them.

Contents: 10 pieces.
1 emotions barometer, 7 wooden balls, 1 cork, instructions. Material: Birch Panel, Acrylic, Beech. Dimensions: H 18,3 x B 8 cm, Ø ball 2 cm.

Features:

- highly stimulating
- ideal for circle time or project weeks
- no complicated preparation required
- includes instructions with game ideas
- helps to develop communication, vocabulary, empathy, and fine motor skills

4+ years 1+ player varies

350765

Feelix & Fay – Emotions Matrix

Each board shows a basic emotion. The relevant picture cards are placed on the board in order of increasing intensity. This helps children to learn about different intensities of feelings.

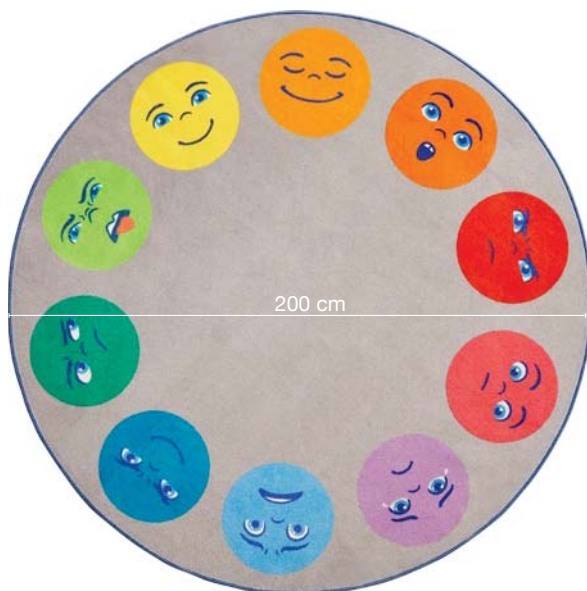

Contents: 97 pieces.
6 boards (joy, surprise, anger, sadness, fear, disgust), 90 picture cards (15 per emotion), instructions.

Features:

- versatile with several difficulty levels
- helps children to learn about facial gestures and body language
- highly stimulating

4+ years 1-6 player 10-20 min

356113

Feelix & Fay – Emotions Rug

The rug shows the basic emotions (joy, surprise, anger, sadness, fear, and disgust) as easily understandable faces. The rug offers lots of opportunities for discussions. It can be used for pantomime games such as “Which emotion am I showing?”

Material: Polyacrylic, latex; cut loop pile (H 7 mm), bound edge. Dimensions: Ø 200 cm.

Features:

- harmonious, calming colors
- offers opportunities for discussions or games
- non-slip
- helps to develop an understanding of emotions, communication, and vocabulary

356121

Feelix & Fay – Emotions Cushions Set

The cushions can be used to sit on, or can be combined with the “Emotions” carpet, item no. 356113. The smiley faces show basic emotions (joy, pride, surprise, shame, sadness, fear, schadenfreude, disgust, jealousy). The cushions can also be used in games such as musical chairs.

Contents: 10 pieces.

10 cushions with images on one side. Material: Foam with fabric cover. Washable in the gentle cycle at 30°C. Dimensions: Ø 35 cm, H 5.5 cm.

Features:

- help to develop an understanding of emotions and communication, and build vocabulary

Develop empathy

350766

Feelix & Fay – Empathy Picture Cards

These picture cards help children to identify and understand emotions. The first deck of cards show clearly attributable emotions (joy, surprise, anger, sadness, fear, disgust, pride, shame, smugness, and jealousy). The situations on the second deck of cards allow for some interpretation. Children therefore learn not just about their own emotions, but also learn that people in the same situation may feel differently.

Contents: 60 laminated picture cards (18 x 13 cm) with faces and answers on the back, 10 wooden chips (Ø 5 cm) showing 10 different emotions (faces), instructions.

Features:

- versatile with several difficulty levels
- helps children to learn about facial gestures and body language
- highly stimulating
- helps children to identify and name emotions, understand different emotions in a situation, and develop empathy, communication skills, creativity, and vocabulary

4+ years 1+ player 5-10 min

Learning to understand each other in a playful way

351441

Feelix & Fay – Red Panda Glove Puppet

Fay the glove puppet is a soft, encouraging puppet. She can be used for role plays or as a cuddly toy.

Material: 100% polyester. Washable in the gentle cycle at 30 °C. Dimensions: H 35 cm.

Features:

- highly stimulating
- offers numerous opportunities for discussions
- also suitable for adults' hands
- helps to develop verbal expression of emotions and communication

367768

Feelix & Fay: Skillbox

The Skillbox helps children to regulate their emotions. The different materials encourage them to either work off their emotions, or to engage with the materials to distract and calm themselves down. The objective is for children to be able to use the Skillbox without instruction.

Contents: 1 activity dice with card slot, 6 activity cards, 1 rattle tube, 1 gel pad with textured edging, 1 magic wand with glitter, 1 red panda comfort toy, 1 cuddle cushion, 1 gear wheel finger toy, 1 ripple ball, 1 click-clack ball, 1 stress ball, instructions.

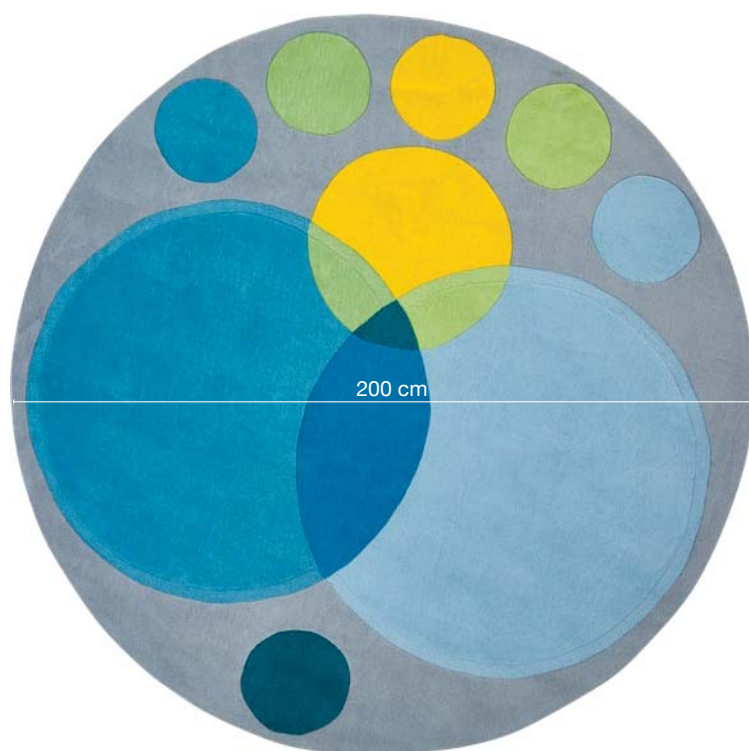

Features:

- versatile materials for individual activities
- with cuddle cushion and Fay comfort toy
- helps children to identify and evaluate emotional triggers
- teaches children how to regulate emotions internally and interactively, and develops self-awareness and self-efficacy

Develop conflict resolution skills and the ability to compromise

366435

Feelix & Fay – Resolution Rug

The soft Resolution Rug looks good in any room, and helps children to resolve conflict situations on their own. The two large areas are for the disputing parties, and the light green area is for a mediator. There is a space between the conflicting parties for a disputed object.

Material: 100% polyacrylic,
H 10 mm, with textile back
and covered stitches.
Dimensions: Ø 2.50 m.

Features:

- harmonious, calming colors
- extremely soft with tangible 3D effect
- helps to develop conflict resolution skills and the ability to compromise
- helps to develop conflict resolution / negotiation skills, communication, empathy, solution-oriented thinking, expression and understanding of emotions

Made in
Germany

350161

Feelix & Fay –

Boundaries and Secrets

Children use the two red cords to set boundaries in conflicts that cannot be overstepped. The wooden traffic lights help them to express their point of view and find a compromise. Children use the secrets cushions to learn about the physical effects of good and bad secrets. They learn which secrets they can or should talk about. The pockets in the cushions can be used to entrust someone with secrets.

Contents: 3 secrets cushions with a pocket (1 x red, 1 x yellow, 1 x green), 2 red cords, 2 traffic lights, instructions. Material: Beech Real wood, Polyester, Cardboard.

Features:

- helps to develop conflict resolution skills and the ability to compromise
- explains the social function of, and physical reaction to, secrets
- suitable for preschool, kindergarten and school
- helps to develop conflict resolution, the ability to compromise, and communication

Children in control of themselves

FEX - Fostering executive functions

Applied
brain research
findings

www.haba-education.com
view our video
on FEX

At home and in preschool, children quickly give in to their first impulse, forget established rules, become loud or defiant ... This is a very normal behavior at this age. They must first develop self-regulation. In order to do so, children need, in addition to well-qualified teachers, a variety of playful and meaningful opportunities related to everyday life that they can practice. The ability to self-regulate is based on the executive functions. A whole range of abilities is meant by this: acting purposefully, blocking out distracting stimuli and thoughts, and responding flexibly when a situation changes. It has been proven in several studies that executive functions are important because you get through life better with them. They are also critical for success in learning. And they can be

trained with sports, music, theater, (manual) work ... and with special games. At the same time, children learn skills, attitudes, and actions that will enable them to have better control of their life.

Prof. Dr. Dr. Manfred Spitzer
Director of the ZNL Transfer Center for
Neuroscience and Learning at the University of Ulm

Executive Functions

Working memory
retain important information

- Store short-term memories and process the stored information
- Remember your own action plans
- Consider alternative actions

Inhibition
Impulse control

- Alternative actions instead of instinctive autopilot
- Measured control of your own actions
- Improved concentration

Cognitive flexibility
mental agility

- Adapt to new situations and challenges
- See people and situations from different perspectives and shift between them
- Learn from mistakes

the builder....
memorizes a
structure

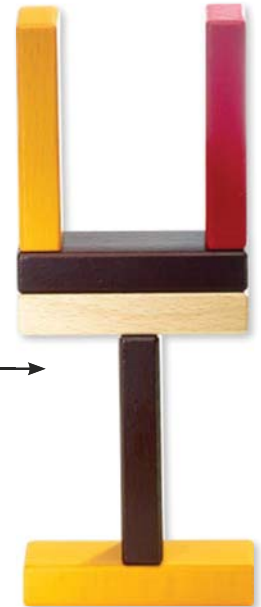

.... and tries to recreate it from memory,
while the troublemaker is distracting
him or her at the same time.

the cube ...
... determines the
intensity of distraction.

the troublemaker
draws a distraction card and tries to
distract the builder accordingly

384538

Fex - Never Mind!

Don't be distracted. But that's easier said than done! Using every means, Fex tries to make as much trouble as possible and distract the builder from working. In order to win, the players must focus on their tasks. Children also learn how to be able to deal with disruptive stimuli. The game includes a solo version as well as versions with different levels of difficulty.

Contents: 104 pieces.

24 colored bricks, 30 building plan cards in 3 different levels of difficulty; Pink (difficult): 12 cards with 6 bricks, Blue (medium): 12 cards with 5 bricks, Green (easy): 6 cards with 4 bricks, 6 disruption cards, 6 calm-down cards, 1 stopwatch, 1 battery AG13, 1 dice, 15 Fex point chips (= 5 points), 20 Fex point chips (= 1 point), 1 set of instructions.

Features:

- trains inhibition
- fosters controlling attention
- with variable levels of difficulty and a solo variation

384539

Cooking with Fex

Cooking apprentices with a good memory wanted! Fex the chef wants to cook a big menu. To make sure nothing goes wrong, the children have to help him. But only those who concentrate hard and make as few mistakes as possible can master the high demands on a chef and collect the coveted Fex points. The more ingredients a child has to remember, the greater the challenge for their working memory. The game also trains attention control, as the chefs should not be distracted by the guests' table conversations.

Contents: 155 pieces.

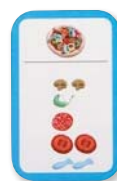

1 booklet, 1 baguette, 1 pizza (6 pieces), 2 slices of toast, 3 slices of salami, 3 slices of bear sausage, 3 slices of cheese, 3 slices of tomato, 3 lettuce leaves, 3 chili peppers, 3 sardines, 3 olives, 3 mushrooms, 4 onion rings, 1 Fex basket, 25 Fex point chips (= 5 points), 25 Fex point chips (= 1 point), 48 order cards, 3 price lists, 5 ingredient allergy cards, 6 color allergy cards, 1 box for cards.

Features:

- trains the working memory
- helps to develop attention control
- with variable levels of difficulty

- Trains the working memory
- Fosters controlling attention
- With variable degree of difficulty

The chef remembers the
ingredients he needs

.... and prepares them.

If the guest has an
allergy, these
ingredients must not
be put on the pizza.

Top the pizza and
check it against the
order!

Is it right?

Getting into Shape for the Future!

Starting from scratch

Brick on brick – Building one's own learning universe

Children today are growing up in a mechanized, automated, and digitalized world. In order to meet these challenges, children need to build essential skills such as creative thinking, self-esteem, and working alone as well as being a good team player. The OECD study "Starting Strong 2017" demonstrates that early childhood education is important for developing these skill sets. This approach was already clear to Friedrich Fröbel who founded the first kindergarten in 1840, thus laid the corner-

stone for an innovative early childhood education concept. In his day, he was considered to be a rebel, yet today he is as relevant as ever. Fröbel's "Spielgaben" (Gifts) are both simple and sophisticated at the same time. Inspired by them, we have further developed Fröbel materials, which are captivating with their clear shapes and flexible creative techniques. The materials always build from the simple to the complex, offer children a variety of design ideas, and create many learning opportunities.

Develop spatial awareness with the stacking balls

367486

Stacking Balls

Stacking set with level of difficulty adjustable to the age of the child, helps to develop organized building and coordination.

Contents: precise list? Material: Birch plywood, beech, polyester? Dimensions: Ball Ø 4.6 cm.

Features:

- stimulating set in attractive colors
- helps to develop fine motor skills and organized building
- for calm and dexterity
- helps to develop spatial awareness, and color and shape differentiation

384808

Fröbel Marble Game

The appealing, clear shape of the ball in the bright colors of the rainbow and the material wood, which Friedrich Fröbel anchored in his educational concept, makes the game particularly inviting. The balls are laid on the board freely or following templates to form lines, patterns, mandalas, and three-dimensional structures. To increase the degree of difficulty, children can also try doing this with pliers or 2 spoons.

Contents: 86 pieces.

36 wooden balls (4.6 cm) in the colors of the rainbow (6 each in red, orange, yellow, green, blue, violet), 1 board (31 x 31 cm), 1 pair of wooden pliers, can be dismantled into 2 spoons, 30 template cards, 1 set of instructions.

Features:

- highly inviting game with a variable degree of difficulty
- for forming numerous, varied and beautiful Fröbel shapes
- 10 templates "from point to line" (lines and symmetrical patterns), "from line to area" (area-wide patterns) and "from area to body" (three-dimensional structures)
- promotes concentration, color differentiation, and understanding of symmetry
- supports fine motor skills, hand-eye coordination, and spatial perception

155244

Fröbel Arranging Material

The large sorting and arrangement box contains – beautifully arranged in 9 compartments – colorful arrangement material in the following shapes: arches, triangles, semicircles, rhombuses, rectangles, rings, disks, hexagons, rods, trapeziums and squares. The arrangement material is designed in old and new Fröbel colors. Users can sort the material by color and shape, and arrange it freely or based on templates. The perfect partner: the template cards printed on both sides (order at the same time: item no. 155378).

Contents: 1242 pieces.

Material: sorting box made of wood. Dimensions: sorting box L 49.5 x W 36.5 x H 7.5 cm, ring Ø 5.5 cm, square L 2.5 x W 2.5 cm, thickness of pieces 6 mm.

Features:

- for sorting and arranging pictures
- lots of shapes and colors (including new Fröbel colors!)
- in a wooden box with sliding lid

10 templates

155378

Fröbel Template Cards

Wipeable template cards printed on both sides, with varied animal, nature and geometric motifs. For use with the “Fröbel” Sorting and Arrangement Material Box (order at the same time: item no. 155244).

Contents: 10 pieces.

10 cards printed on both sides. Material: card-board. Dimensions: L 25 x W 25 cm.

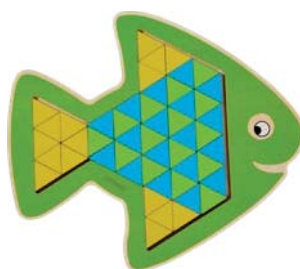

Features:

- used with the “Fröbel” Sorting and Arrangement Material Box
- printed on both sides
- wipeable

puzzle arranging
frame

379720

Arranging Puzzle Animal Trio

The attractively designed learning material made from wood is highly stimulating. When putting together the puzzles with the animal trio of owl, fish and snail, new, delightful patterns are created again and again – with or without the puzzle frame. Equilateral triangles can also be arranged without a frame into mandalas or pictures from nature and everyday life. The basics of symmetry and geometric shapes are taught at the same time. You can find more about the Fröbel concept and examples for linguistic support at www.haba-education.com.

Contents: 243 pieces.

3 animal motifs as arrangement frames, 240 arrangement triangles in 6 colors of the rainbow. Material: plywood, 4 mm thick. Dimensions: snail 27 x 17.5 cm. Triangle edge length: 2.5 cm.

Features:

- for arranging patterns and mandalas with and without frames
- trains the perception of symmetries and geometric shapes
- encourages fine motor skills, shape and color differentiation and creativity

379242

Fröbel "Seasons Tree"

Nature plays a key role in Friedrich Fröbel's pedagogy. This wooden season tree is a fantastic way of learning about the changing seasons. The attachments and decorations have simple yet appealing geometric shapes that can be matched to the seasons and attached to the seasons tree. This can inspire discussions and opportunities to learn about the seasons, natural, and geometric shapes.

Contents: 20 pieces.

Unassembled tree (approx. 35.5 x 28 cm), 12 round wooden decorations, 6 wooden attachments (2 circles, squares, and triangles), instructions.

Features:

- creates opportunities for discussion about how nature changes through the seasons
- the geometric shapes – circles, squares, and triangles – teach an understanding of aesthetics and geometry
- helps to develop fine motor skills, hand-eye coordination, color, shape, and theme sorting, and color differentiation

Fröbel

341253

Window Film

Fröbel "Geometric Shapes"

Fröbel's Gifts as a window decoration with learning effect, newly interpreted: Choose template and assemble motif. Motifs can also be freely assembled without a template. The shapes stick on both sides on all smooth surfaces and are smudge-proof and reusable.

Contents: for approx. 18 motifs.

21 adhesive cutouts with geometric shapes, 6 motif templates, stamped, instructions.

Dimensions: hexagon approx. 7 x 6 cm.

Level of difficulty: easy.

Fröbel thought on the window film:

- Fröbel's 7th and 8th Gift as a window film
- fosters understanding of aesthetics, symmetry, and geometry
- shows how new shapes develop from different ones
- encourages assembly of beautiful patterns, pictures, and motifs from everyday life

341257

Window Film Fröbel "Season Tree"

A window picture for the whole year! The season tree changes with nature and offers quite a sight in spring, summer, fall, and winter. Simply separate the tree trunk and stick it on the window. Depending on the season, circles, semicircles, and triangles are separated and cut out and decorated as leaves, flowers, apples, or snowflakes around the branches. The shapes stick on both sides on all smooth surfaces and are smudge-proof and reusable.

Contents: for 1 tree.

12 transparent adhesive films in 10 colors, partially stamped and printed; instructions.

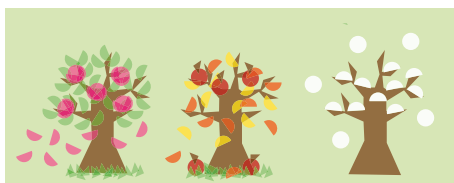

Dimensions: base of tree trunk 44.6 x 33 cm.

Level of difficulty: easy.

Fröbel thought on the Season Tree:

- encourages talking about nature throughout the seasons
- fosters understanding for aesthetics and geometry with the help of basic geometric shapes
- fosters fine motor skills, differentiation of shape and color, and creativity
- for variable designing of a seasonal window decoration

The right one for small construction workers: **Fröbel** Play Carpet

Features:

- inspires creative building
- basic symmetrical pattern creates structure and direction
- different patterns in rainbow colors can be used as building templates
- thick carpet with anti-slip backing
- helps to develop spatial orientation, faculty of abstraction

377828

Fröbel Play Carpet

This thick, high-quality carpet with cheerful, rainbow-colored pictures makes construction a lot of fun. Different Fröbel shapes – items from daily life such as a house, butterfly, or apple – are used as a construction pattern. The practical, 5 x 5 cm square grid matches the Fröbel Maxi Placing Material (item no 379244). Placing and stacking pieces in the basic symmetrical pattern reflects Fröbel's traditional Forms of Beauty, Forms of Life, and Forms of Knowledge.

Material: polyester, latex
(anti-slip backing), linked edging.
Dimensions: Ø 3 m.

Fröbel

371673

Fröbel Bead Threading Set

These beads are very inspiring and stimulating: Friedrich Fröbel emphasized the clean, appealing shape of spheres in his pedagogic teachings. Their 6 bright rainbow colors and the tactile wood are as attractive now as they were back then. The beads can be threaded freely or using one of the templates to make what Fröbel called 'Lebensformen' (everyday shapes) such as figures, animals, plants, and symbols. A range of templates can be used to increase or decrease the difficulty level.

Contents: 296 pieces.

244 wooden beads (small Ø 16 mm, medium Ø 20 mm, large Ø 25 mm), in 6 rainbow colors, 20 cord stoppers, in red, blue, orange, green, 21 rubber bands, in yellow, red, blue, 10 template cards with 3 difficulty levels (easy, medium, hard), instructions.

Features:

- for threading numerous and varied Fröbel shapes
- incl. 10 template cards with 3 difficulty levels
- helps to develop concentration and attention, fine motor skills, and hand-eye coordination as well as color differentiation and creativity
- develops an understanding of proportions and symmetries

Fröbel

379244

Fröbel "Maxi" Placing Material

The "Maxi" Placing Material is clearly arranged in a high-quality materials box and includes the following shapes: arches, triangles, semicircles, rhombuses, rectangles, rings, disks, hexagons, rods, trapeziums and squares. Designed in Fröbel's rainbow colors. Shapes are based on Fröbel's recommended placing materials, with standard edge lengths (5 cm). This uniform shape makes it easy to create lots of different patterns. The material can also be sorted by color or shape, and used to create and partition shapes and quantities. Ideal when combined with the Fröbel Construction Carpet (item no 377828).

Contents: 588 pieces.

Material: Wood. Dimensions: Sorting box L 52 x W 38 x H 10 cm, ring Ø large 11 cm, medium 8 cm, thickness of pieces 6 mm.

Features:

- extra-large format for younger children
- attractive, high-quality materials in sturdy sorting box
- for forming numerous and varied shapes, quantities, and patterns in the 3 Fröbel categories: forms of Beauty, Forms of Life, and Forms of Knowledge
- teaches the fundamentals of geometry, symmetry, and mathematics, hand-eye coordination, and faculty of abstraction through play

157248

Fröbel Weaving Strips Set

Whether for weaving or crafting stars or garlands - this supply of weaving strips in bold colors and different shapes will last for lots of projects! Tip: The weaving strips are beveled to make the weaving easier. After weaving, simply cut off and attach the ends.

Contents: 540 strips.

Construction paper 130g/m² in 6 colors.

Dimensions of the beveled strips: 49 x 1 cm, 49 x 1.5 cm and 49 x 2 cm.

Level of difficulty: easy.

Age: 3+

Features:

- Fröbel thought: - for weaving aesthetic, geometric patterns in different colors and widths
- fosters understanding of aesthetics, symmetry, and geometry
- weaving and counting train basic mathematical knowledge
- many colors for different formats and varied crafting projects
- lots of colors, different formats
- bulk pack for groups

196075

Fröbel "Christmas Weaving Cards"

Simple weave the strips through the strips in the weaving cards and fix in place. Glue the mounts to the weaved sheets and the weaving cards are finished.

Contents: for 12 pieces.

Weaving sheets, mounts in three patterns (star, bauble, tree), weaving strips in 2 widths (1 or 2 cm) and 6 colors, instructions. Material: Poster board Dimensions: 15 x 15 cm.

Level of difficulty: easy.

Age: 3+

Features:

- for weaving aesthetic geometric patterns
- fosters understanding of aesthetics, symmetry, and geometry
- weaving and counting teaches basic mathematical knowledge
- activities are easy to talk through

182685

Fröbel Animal Pricking Set

Beautiful animal patterns can be created on the cards. Simply prick out the printed lines on the picture. Pricking out the details creates raised surfaces. The picture can then be decorated with stick-on eyes.

Contents: for 18 cards.

18 printed cards in 6 colors (pink, May green, ice blue, purple, banana yellow, ochre) and 6 pictures (pig, sheep, hare, cat, dog, cow), stick-on eyes, instructions. Material: Photo card Card dimensions: approx. 10.5 x 14.5 cm.

Level of difficulty: easy.

Age: 3+

Features:

- creating different patterns based on Fröbel's everyday shapes
- varying levels of difficulty
- promotes fine motor skills, hand-eye coordination, shape and color differentiation, and creativity
- trains concentration and understanding of symmetry, structure, and rhythm
- activities are easy to talk through

182671

Fröbel Embroidery Cards

Use the cards to create a small, colorful world from beautiful, child-oriented patterns. Simple color in the patterns and prick the points along the lines. The holes can then be pricked out.

Contents: for 12 cards.

12 printed cards in 2 colors (light green, sky blue) and 6 patterns (2 flowers, house, sun, tractor, car), instructions. Material: Photo card Card dimensions: approx. 17.5 x 12.5 cm.

Level of difficulty: easy.

Age: 4+

Features:

- embroider different patterns based on Fröbel's everyday shapes
- variable levels of difficulty
- promotes fine motor skills, hand-eye coordination, shape and color differentiation, and creativity
- trains concentration and understanding of symmetry, structure, and rhythm
- activities are easy to talk through

Building sets with 5 cm edge length for the classic 10 x 10 grid

Made in
Germany

158528 Fröbel Building Kit Wagon

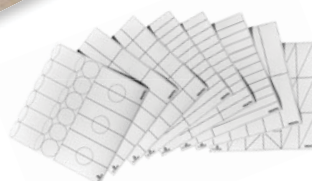

Complete building set cart made of unfinished, smoothly sanded beech wood boxes with roller base. The contents of the building set cart correspond to the 8 Fröbel building sets (222 pieces).

Contents: 224 pieces.
Dimensions of the cart: approx.
L 68.7 x W 35.7 x H 35 cm.

Features:

- basic geometric shapes for first independent building
- geared toward the Gifts according to Fröbel
- for numerous and varied shapes and structures in the 3 Fröbel categories: Forms of Beauty, forms of Life, and Forms of Knowledge
- fosters through play understanding of the fundamentals of geometry, symmetry, and mathematics

Fröbel Building Kit Cubes
Contents: 36 pieces.

Fröbel Building Kit Prisms
Contents: 48 pieces.

Fröbel Building Kit Cuboids
Contents: 18 pieces.

Fröbel Building Kit Half Cuboids
Contents: 24 pieces.

Fröbel Building Kit Long Cuboids
Contents: 12 pieces.

Fröbel Building Kit Short Strips
Contents: 36 short strips

Fröbel Building Kit Long Strips
Contents: 24 pieces.

Fröbel Building Kit Bridges and Cylinders
Contents: 24 pieces.

All building sets are made of unpainted, smoothly sanded beech wood.
Dimensions: L 33 x B 33 x H 6.5 cm.
All include arranging templates.

From the simple to the differentiated

Children best receive wooden blocks in units that build one on top of the other. All blocks have a uniform basic size. Children first explore the blocks in free play. With each building kit, more complex shapes follow, such as prisms, bridges, and cylinders for an increasingly differentiated play. The children can form numerous shapes and structures with many variations from the

block shapes. Fröbel called these *Forms of Beauty*, *Forms of Life*, and *Forms of Knowledge*.

Using their own hands, children understand the basics of geometry and mathematics. Through play, they open

up for themselves the world and its regularities.

Forms of Knowledge

First insights into mathematics and geometry

Forms of Beauty

Symmetrical circular patterns/mandalas

Forms of Life

Objects from everyday life

Science, Technology, Engineering, Mathematics

As humans, we experience curiosity throughout our lives. It drives us to re-explore the world around us every day. Children in particular enjoy this, as they are passionate explorers. Their enthusiasm for discovering, exploring and investigating natural materials, everyday objects or toys is boundless. Children love climbing trees, building a den out of sticks, or watching beetles in an insect box. They also love taking a photo with a parent's mobile or playing their favorite song using voice commands. All these experiences build the foundations for areas that they will meet in the next stage of their life: Mathematics, research, experimenting, technology, and digital learning.

LEARN ABOUT THE DIGITAL WORLD

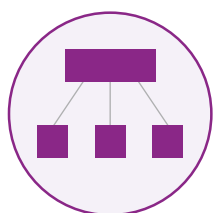

ON THE ROAD TO CODE

... we introduce children to the exciting digital world. We teach them the fundamental skills needed to understand digital media and express their own creativity. Our Digital-Starter products are designed for children's

everyday life and enable them to learn about abstract topics through play. We focus on analog products which are fun to train logic, creativity, and abstraction skills.

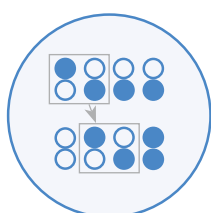

Computational thinking

is the ability to recognize problems, apply abstraction skills, and identify the individual steps needed to solve them. The solution is intended to be implemented by both people and computers.

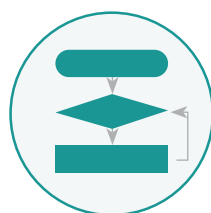

SEGMENTATION

A complicated task is separated out into disparate, solvable problems. The principle is applied to both everyday tasks and when creating an algorithm.

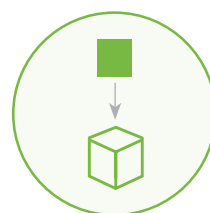

PATTERN RECOGNITION

Repetitions and regularities occurring in a lot of information are recognized. The features common to all objects in a category are identified and differentiated from the rest.

ALGORITHM

A problem or a whole group of problems can be solved by defining the separate stages of a solution, their order, and any dependencies. The algorithm indicates the precise course of action to solve a defined problem.

ABSTRACTION

The essential facts in a large group of information are identified. Non-essential details can thus be ignored, simplifying the problem. General solution strategies can be developed using the principles of abstraction.

Digital Starter: Coding Labyrinth

What is the shortest route for the robot to get to their goal and still carry out specific tasks along the way? Three games encourage children to play the part of the robot dog "WiFi" and its programmer, and navigate through the tricky maze using all their senses. To do this, they "translate" the tasks into simple codes, helping them to develop a deeper understanding of how computers, programming codes, and "programming loops" work.

Contents: 17 bases, 18 template cards, 1 small coding card, 61 large coding cards, 1 dog + wooden base card, 1 ball card, 1 bone card, 1 board, 1 set of instructions.

Features:

- getting to know how a computer works and the basic principles of computational thinking through playing
- guaranteed puzzle fun developing simple codes
- high-quality materials that encourages children to try things out

DIGITAL STARTER CONCEPT
p.80

367487

Digital Starter: Machine Learning

Computers can learn, too, and this exciting placing game helps children to learn how they do it. Playing the part of the robot dog, WiFi, they have to find out which gift parcels contain a delicious bone. To do this, they check some of the parcels and work out the rule that tells them where the remaining bones are hidden. It's a fun way to learn about the complex world of algorithms and artificial intelligence. High-quality materials and varying levels of difficulty ensure the game is never boring.

Contents: 18 wooden gift parcels, 1 wooden robot dog figure (WiFi), 18 wooden dog bones, 16 templates, 16 feature sheets, 1 set of instructions.

Features:

- getting to know through play how a computer works and the basic principles of computational thinking
- guaranteed puzzle fun discovering and applying search algorithms
- high-quality materials that encourages children to try things out

368316

Making Set "Light Monster"

The secret behind the little light monster with the blinking nose is LEDs and some adhesive copper tape. Simply paint the individual pieces, stick them together, close the circuit, and it's done. A simple craft idea that looks great, combining creating and having fun with electronics and technology.

Contents: for 12 pieces.

The set contains everything that you will need: Photo card, printed and stamped, stick-on eyes, LEDs, adhesive copper tape, 3V button cells, instructions. Level of difficulty: easy.

Features:

- simple and quick to put together
- a great first experience of electricity and technology

Make them shine!

 WWW.HABA-EDUCATION.COM
Media Literacy for early years

207980

Making Set

With this basic set, 6 children can make a snail roll, give cards light effects, or create a painting robot. The instructions state everything you will need.

Contents: instructions for 3 craft ideas, 10 m adhesive copper tape, 6 battery boxes (for 2 AA batteries each, please order separately) with cable and switch, 30 LEDs, 6 slide switches, 5 m switching wire, 6 DC motors.

Features:

- creative fun with little preparation
- includes instructions for 3 craft projects
- a great first experience of electricity and technology

351755

"Light Rockets" Craft Set

Before the rockets can shine with magical light, you will need to: assemble the wooden pieces, paint them imaginatively, thread the EL wire through the holes, and insert the batteries (please order separately). Two flashing options can be chosen using the switch.

Contents: for 6 pieces.

36 wooden cutouts, 6 EL wires in 6 colors with battery holder, instructions. Requires 12 x AA batteries (not included). Dimensions: approx. 16.5 x 12 x 7 cm. Degree of difficulty: medium.

Features:

- painting and threading fun with light effect
- simple idea with lots of room for creativity

367581

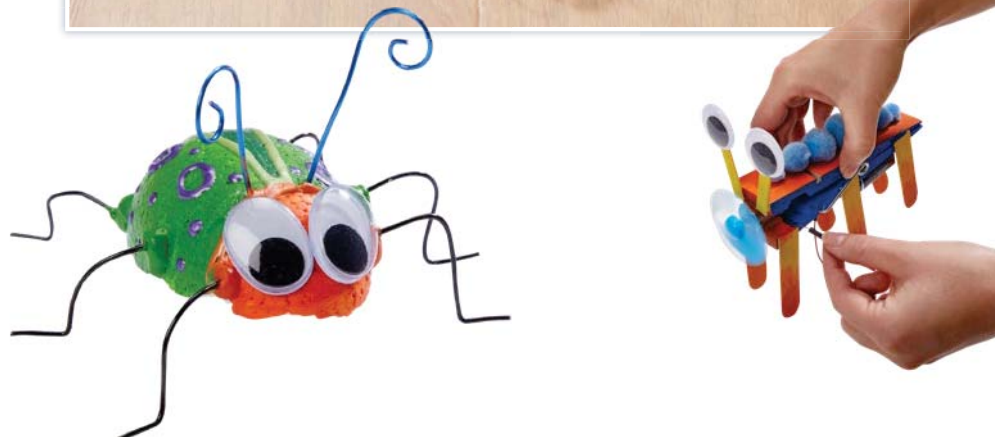

Making Set II

Anyone who liked the Making Set (item no. 207980) will love this set, too. Six children can play with the contents, including using the following 3 ideas: Hot wire, bee, fan animal. The instructions state everything you will need.

Contents: Instructions for 3 items to make, 10 m copper wire, 6 battery clips for 9V battery, 6 propellers (colors depend on stock), 12 flexible wire jumpers (red wire), 12 flexible wire jumpers (black wire), 6 mini vibration motors, 6 battery holders for button cells with on/off switch.

Features:

- box for three fantastic new making projects
- creative fun with little preparation
- a great first experience of electricity and technology

Play with Numbers & Quantities

671745

Magnet Maze

The little ones can move the colorful balls through the labyrinth "just like that" using the magic pen. Older children can do math at the same time. 6 exercise cards are included.

Contents: 7 pieces.

Game board made of wood.

Dimensions: 29.5 x 29.5 cm.

Features:

- with 6 exercise cards for practicing
- game board made of robust wood
- encourages hand-eye coordination and concentration

Numbers Carpet "20"

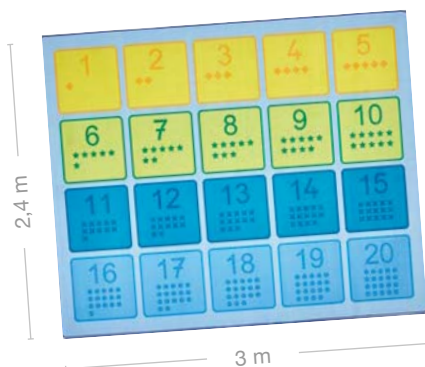

Playing and learning carpet for the numbers up to 20. Structured representation of numbers in blocks of five, as both quantities and digits.

Contents: Textiles, polyester, latex.
Dimensions: L 244 x W 300 cm.

Features:

- a playful way to learn about the numbers up to 20
- ideal for deepening knowledge
- suitable for physical games with several children
- with non-slip backing

053134

Number Flowers

Number flowers and petals invite you to do math. Template chips show how a flower can be recreated with a stamen and felt petals. The first mathematical correlations are taught at the same time!

Contents: 123 pieces.

10 colored stamens (numbers 1 to 10), 10 wood-colored stems, 1 wood-colored stamen, 55 colored felt petals, 1 fabric bag, 1 petal die, 1 picture die, 42 template chips, 1 base plate, 1 set of instructions. Type: number and sorting game.

Features:

- extensive number and sorting game with various tasks
- for learning the first mathematical correlations
- trains cognitive skills

Get on Willys Number Train

**Made in
Germany**

183336

Willy's Number Train

The beautifully designed wooden train comprises the locomotive and 11 carriages, representing the numbers from 0-10. 1-10 colorful wooden discs can be placed on them and carried around. It's clear that NOTHING can be placed on the carriage representing zero. The dice spots displayed on each carriage and attachable flags with the corresponding numbers illustrate the number picture and the quantities. The carriages can be joined together and run on stable wheels and axles. In the cab of the locomotive, there is space for the two wooden figures: the number fairy Forget-Me-Not and the goblin Muddle! All aboard, the journey to Numberland is setting off! Cheerful game ideas and short accompanying stories promote understanding of numbers and quantities.

Contents: 129 pieces.

1 locomotive, 11 carriages, 2 wooden figures: Number fairy Forget-Me-Not and goblin Muddle, 100 wooden discs in 10 colors (10 for each color), 11 number flags (0-10), 1 fabric bag, 2 dice, instructions. Dimensions: Carriage 13 cm; complete train 172 cm.

Features:

- sturdy wooden train over 1,7 meter long
- can be combined with almost all Numberland products
- promotes understanding of numbers and quantities
- first arithmetic in the number range up to 10

"Stay Healthy" Food Pyramid

The high-quality 3D Food Pyramid encourages players to match the foods made of wood to the differently colored levels of the pyramid. The colors of the levels and the symbols shown on them help in matching and at the same time act as a traffic light display: the foods on the green level can be eaten in plentiful amounts; those on the red level should only be eaten occasionally. In a demonstrative way, players learn about the food groups and their importance for a healthy diet. The instructions contain information, game ideas, and ideas for use in preschool, school or therapy.

Contents: 41 pieces.

1 food pyramid with 5 levels (detachable),
39 wooden food items, 1 cloth pouch,
1 color die, 1 set of instructions. Material: wood.
Dimensions: Ø 40 cm, height 50 cm.

Features:

- highly stimulating 3D food pyramid
- visually and haptically appealing material activates all the senses
- a fun and educational game about healthy eating
- detailed instructions with many game ideas

Know your Body Puzzle - Boy & Girl

These layers puzzles show child-friendly the building of the human body: the skeleton, organs, muscles and dressed child.

Contents: 28 pieces.

Material: Plywood.

Dimensions: 29 x 15 x 30 cm.

Features:

- both puzzles consist of 4 layers
- encourages matching and cognitive skills, spatial perception, and conscious self perception

3+ years 1+ varies

Loads of Cubes Pattern Thinking

Large quantities of the same material encourage children to create their own structures and shapes. This lets them structure the chaos, and create patterns and mathematical motifs. Suitable for creating 3D shapes like dice or rolls, or geometric shapes like circles, squares and regular triangles. Children love stacking cubes and building them into towers, walls, larger cubes etc. By letting children's imagination run wild and simply letting them build or arrange whatever they want they "dive into mathematics". The mathematically identical values

also mean that the numbers and their relationship to one another can be represented. This lets a collection of cubes be clearly translated into numbers and number structures, for example 10×10 . A tower with 5 cubes is very clearly only half as tall as a tower with 10 cubes. The cubes therefore represent the regular composition of our numbers. The smallest unit is 1 (= 1 cube), which you can see and use to create all other numbers.

Form the middle,
illustrate "straight" and "uneven"

500 cubes,
painted white

025395

White Cubes, bulk pack

Many white cubes of the same size with straight edges want to be brought into shape. Which pattern or which structure emerges – whether tower, circle, walls, or squares – is a matter of one's own creativity and imagination. Thanks to the exact same size, the cubes form surfaces without any holes.

Contents: 500 pieces.

Material: wood, stained white. Dimensions: 2.5 x 2.5 x 2.5 cm

Features:

- a large number of the same cubes promotes mathematical understanding and imagination
- stimulates intellectual capacity and creativity through developing patterns and structures

(without basket)

136379

Dice, bulk pack

The large number of dice with dots (from 1 to 6) encourages the arrangement of number patterns or creation of certain shapes and geometric patterns.

Contents: 200 pieces.

Dice material: wood, natural finish. Dimensions: 3 x 3 x 3 cm.

Features:

- 200 dice with rounded edges
- combine geometry and arithmetic in a playful way
- combine with: woven baskets for sorting and storage (item no. 042294)

157133

Reversible Fabric Basket

The reversible, round fabric basket in a practical size is perfect for storing toy bricks, sensory materials, balls etc.

Material: 55% polyester, 45% polyacrylic The woven fabric is sturdy, tear-resistant, holds its shape, doesn't fade or rub, and can be washed at 30°C. Design dependent on stocks. Dimensions: Ø 39 cm, H 36 cm (uncarded).

378880

Wooden Disc Sorting Set

240 wooden discs in yellow, orange, red, purple, blue, and green. For counting, sorting, stacking, arranging, and creating patterns. inc. Fabric pouch.

Material: wood Dimensions: Ø 2.5 cm x H 3 mm.

Features:

- helps to develop color recognition and sorting
- teaches children about simultaneous quantity recognition
- trains the fine motor skills

"Colorful wooden dice" set

Wooden dice in 6 colors in a fabric bag. Ideal for stacking, sorting, and experimenting. Good with the Dice Pyramid, item no 109551.

Contents: 216 pieces.

Material: beech. Dimensions: 3 x 3 x 3 cm.

Made in
Germany

096304

Cube Panel

The cubes in 6 colors can be stacked between the wooden dowels to make cool patterns and constructions. Includes 72 cubes (3 x 3 x 3 cm) and collecting pouch. Matches the sensory walls.

Contents: 73 pieces.

Material: base panel made of real birch wood. Dimensions: 40.6 x 43.2 cm.

Features:

- easy to handle cubes in 6 colors
- with practical storage basket
- promotes spatial thinking, ability to combine, creativity, and motor skills

Creative Wall Panel for Building and Sorting

Building up High

102 wooden blocks

188944

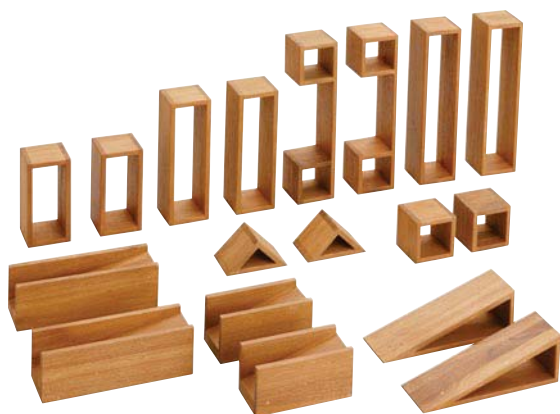

"Stacking Blocks" Construction Kit

Everything plays a part: The high-quality blocks measure 4 x 4 cm and are available in different lengths. There are also curved blocks. The pieces are all very stable, thanks to the clever tongue and groove system. You can even use them to build arches.

Contents: 102 pieces.

Robust, stackable wooden box (L 55.5 x W 30.5 x H 9.5 cm) including 102 stackable blocks (2 x L 24 cm, 8 x L 16 cm, 4 x L 12 cm, 4 x L 8 cm, 84 x L 4 cm, dimensions of all blocks 4 x 4 cm). Material: beech.

143251

Outdoor Building Blocks

These weather-resistant XXL wooden building blocks made from robust wood are perfect for outdoors. Thanks to their different appearances, they offer a great deal of potential for creative building. Even cars or balls can roll down their ramps.

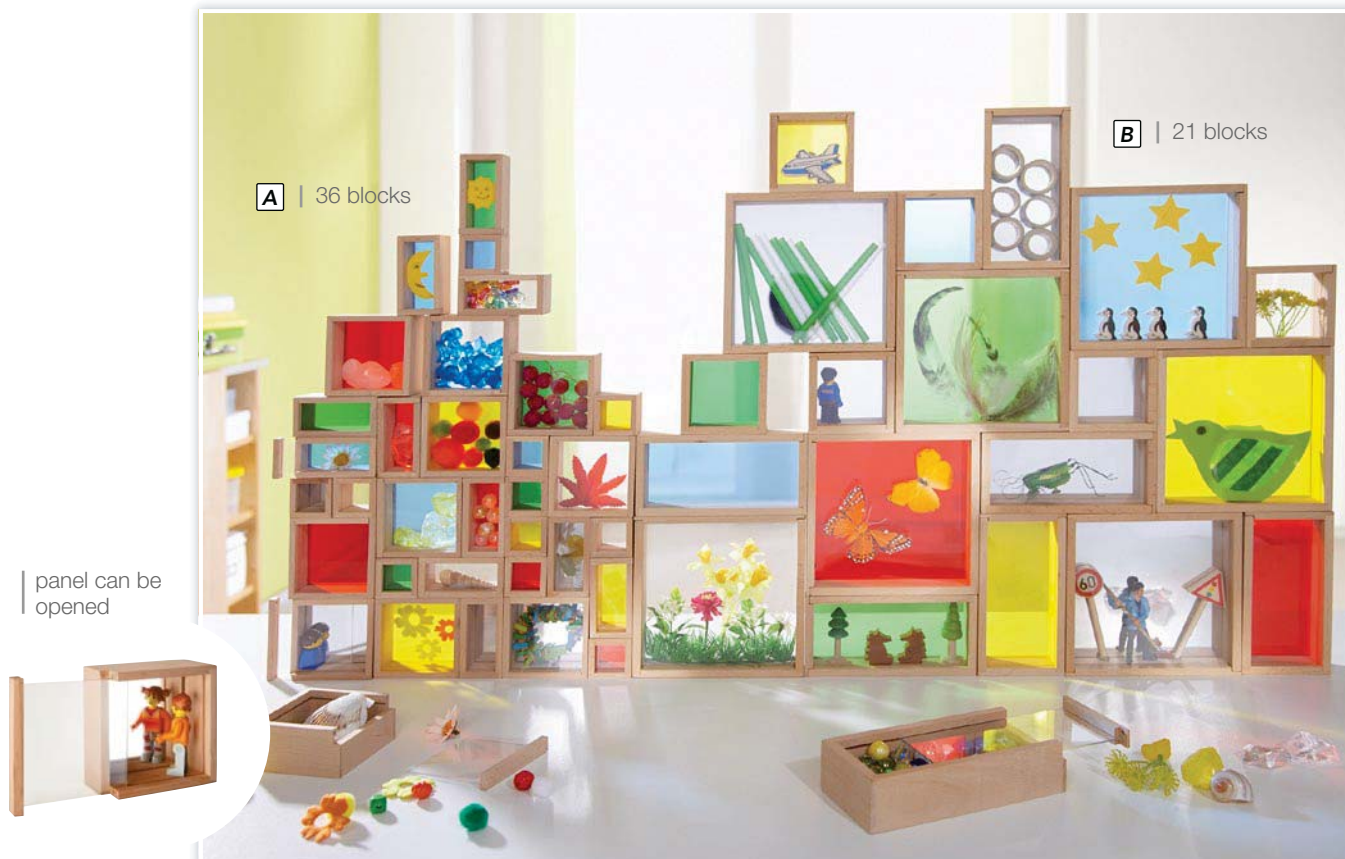

Contents: 24 pieces.

Material: eucalyptus wood, 2 cloth bags. Dimensions: largest building block cuboid L 48 x H 12 x W 12 cm.

Features:

- easy-to-grip XXL wooden building blocks
- weather-resistant and suitable for use outdoors
- with ramps for cars or balls to roll down

2+ years 1+ player varies

Fillable Building Blocks

Each building block has two window panels: One colored or mirrored and one transparent. One of the panes in each of the large building blocks can be opened. The blocks can also be filled to create additional effects, e.g. with sand, granules or beads etc. A magnetic fastening ensures that the seal is tight.

Versions: Mirror/clear acrylic, clear acrylic/clear, red acrylic/clear, blue acrylic/clear, green acrylic/clear, yellow acrylic/clear. Material: Wooden frames, colored or clear acrylic panes, mirrors.

A 025263 Window Building Blocks, small

Contents: 12 blocks 4 x 4 x 4 cm (not fillable), 12 blocks 4 x 8 x 4 cm, 12 blocks 8 x 8 x 4 cm

B 025850 Window Building Blocks, large

Contents: 7 blocks 8 x 8 x 4 cm, 7 blocks 16 x 8 x 4 cm, 7 blocks 16 x 16 x 4 cm

Made in Germany

351439

Building mirror, round

In the building mirror, buildings look even higher and more beautiful, patterns even more fascinating. Using transparent building blocks or building materials can create particularly interesting effects.

Contents: 1 piece.

Material: Wood and safety glass.
Dimensions: Ø 50 cm, H 3.5 cm.

Features:

- base for building and stacking
- creates exciting color effects and perspectives
- inspires experimentation
- suitable for tables and floors thanks to anti-slip stopper

Wooden Building Blocks

for a creative, varied play!

- **Different shapes**

Cuboids, cones, cylinders, cubes, and many other shapes

- **Building blocks**

Natural and multicolored

- **Wood is a natural material**

All blocks are made from wood

- **Combinable**

All building blocks, except the Fröbel and Contabulo sets, measure 4 cm. This means that all the sets can be combined with each other.

351438

3D Puzzle Beehive

To make a three-dimensional beehive, 11 double-sided printed wooden puzzle pieces need to be correctly assembled, and placed on the wooden rods on the sturdy base. The front of the completed puzzle shows the outside of the beehive, and the back shows the inside. There are 12 spaces in which the accompanying wooden figures then need to be correctly placed. Ideal for 1-2 children.

Contents: 23 pieces.

11 puzzle pieces, 12 figures, 2 wooden rods, base, booklet. Material: Wood. Dimensions: completed puzzle approx. 27 x 27 cm.

Features:

- 2 difficulty levels: "Flat Puzzling" and "Building Up High"
- with additional puzzle elements on the back
- ideal for little hands: large, easy to grasp puzzle pieces
- supports the visual communication of basic knowledge about nature
- helps to develop: hand-eye coordination, fine motor skills, spatial thinking, shape and pattern association, understanding of natural cycles

Three circular mazes

379240

Magnetic "Cycles" Game

A magnetic pin is used to push small balls through the three circular mazes, helping players to learn about the natural cycles of "Seasons", "Water", and "Bees" through understanding and movement. The magnetic pins are fastened to the frame by string and can be placed in this sideways after playing.

Contents: 3 pieces,
Material: Plastic, wood, magnet.
Dimensions: Ø 30 x H 1.5 cm.

Features:

- high-quality design
- teaches about natural cycles through play
- helps to develop fine motor skills, hand-eye coordination

137063

Earthworm Display Case

What do earthworms eat? You can easily observe in this box how earthworms make their passageways and how, for example, they turn egg shells into soil. The rear pane can be slid upward to empty the case.

Material: wooden frame with acrylic panes.
Dimensions: W 44 x H 43 x D 10 cm.

Features:

- transparent display case for observing and studying
- includes instructions for filling
- rear pane can be slid upward to empty case

135270

Magnifier Center

Makes tiny things huge! Stand includes 6 magnifying glasses with 4 x enlargement.

Contents: 7 pieces.

Material: birch, plastic.

Dimensions: W 21.5 x H 14 x D 10.5 cm, magnifying glasses Ø 11.5 cm, L 22 cm.

Features:

- awakens a desire for discovery and observing closely
- fosters concentration and perseverance

134380

Experimentation Coat

A must for little researchers. The coat protects clothing, and a child will feel like a real researcher with it.

Contents: 2 pieces.

Washable at 30° C, but not suitable for the dryer. Size: 116/122 cm.

Material: 65 % Polyester, 35 % Cotton.

Features:

- ideal clothing for researchers
- protects against soiling
- washable

Features:

- mobile use thanks to casters
- with removable material box for transporting or storing

A 109700

Play Table, Square

Two casters make the table a mobile material wagon and "playmate." The square material box can be removed, taken along to the playground. A wooden panel serves as a shelf. Order at the same time: matching material box.

Dimensions: W 60 x H 50 x D 60 cm. Load capacity up to: 25 kg. Material: water-repellent, painted, 18 mm thick pine wood; legs made of galvanized, powder-coated steel, 2 casters.

tie canvas to make a box

Language, Communication, Social & Emotional Skills

Children love playing with their friends, scrambling about and discovering the world. This can also create conflict, as it's not easy to develop different ways of handling your own feelings and those of others. These conflicts help children to grow and develop the skills to manage them. Adults play an important role in this development. Children around us observe how we solve conflicts and learn the same behavior. Language is the key means of expressing feelings and is closely linked with the formation of our personalities and their stability.

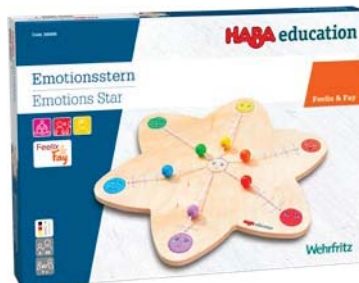

Encourage social-emotional skills in a playful way

Social-emotional skills are key to growing into a happy adult. Children need help and support on this journey in daycare, nursery, and preschool. Social and emotional interactions play a big part in these settings, and so encouraging the development of social-emotional skills is a key aspect of education in early childhood development.

Our educational games range, Feelix & Fay, helps educators to create space for emotions, approach them directly, and address different emotions with each individual as well as with a group.

 **FEELIX & FAY CONCEPT**
p. 86

345666

Feelix & Fay – Emotions Star

The Emotions Star helps children to understand and express uncertain or contradictory feelings. Each arm of the star represents an emotion, and the movable balls on the arm show the intensity of the feeling.

Material: Birch panel, beech, 9 mm thick.
Dimensions: 26.27 x 29.62 cm.

Features:

- ideal for circle time or project weeks
- highly stimulating
- includes instructions with game ideas
- helps to develop verbal expression of emotions, communication, vocabulary, empathy, conflict resolution, and fine motor skills

371650

Emotion Puppets Set

Fear, disgust, joy, sadness, surprise and anger:
Each of the six soft hand puppets has an
different facial expression.

Contents: 6 pieces.

Material: 100% polyester.

Dimensions: L 40 cm. Washable at 30 °C.

Features:

- helps children to understand and verbalize feelings
- creates opportunities for conversation
- ideal for helping “withdrawn” children to open up

DISGUSTING

How do You Feel Today?

Emotional skills or the ability to deal with one's own feelings and those of others, to understand others, to help them, or to comfort them, are important milestones in childhood development. These lead to the ability to negotiate interests with others and thus contribute to a strong community as a strong personality.

Lights and colors appeal to the senses!

| water column
not included

379108

Micro Spa

Stretches out like a large parasol, reaches down to the ground, and creates a small protected "white room" as a place of retreat. Robust, sturdy, 2-part stands. The parasol is water-repellent can be folded.

Material: Fabric cover made from water-repellent polyester. Frame made from metal and fiberglass; dimensions: open Ø 200 x H 115 cm; closed Ø 12 x H 170 cm.

Features:

- ideal for for relaxing
- mobile and easy to put together
- suitable for indoors and outdoors

208065

Sensory Boards

Floor tiles in gorgeous colors and filled with liquid – a wonderfully visual and tactile experience. When pressure is exerted on the tiles, the liquid moves around – different every time, creating unique patterns and flows of color. This makes the tiles very inspiring. The underside is slip-proof.

Contents: 4 pieces.

Material: Acrylic glass. Dimensions: 50 x 50 cm, H 0.6 cm. Load capacity: 200 kg. Set with 4 pieces in various colors: Green / yellow, red / blue, orange / red, and purple / pink.

Features:

- touch with hands or feet and create patterns
- can be used on the floor or table
- anti-slip underside

set of
4 colorful tiles

Learning How to Tell Stories

| 24 small cards

| 10 scene cards

| printed on both sides

| 15 wooden figures

384809

Storyteller

The versatile high-quality material encourages inventing one's own stories. In addition, there are detailed instructions with a theoretical section, read-aloud and read-along stories, poems, and beginnings of stories. Fosters free speaking and storytelling and assists verbalizing feelings and empathy.

Contents: 51 pieces.

8 large and 7 small wooden play figures, each side printed differently; 34 picture cards, 10 large (18 x 18 cm) and 24 small (9 x 9 cm); 1 wooden picture card holder with slot; 1 booklet of stories/instructions.

Features:

- colorful play material for developing one's own first stories
- figures printed differently front and back
- stimulates creativity, imagination, social competence, and self-confidence

| set of 3 cocoons

| family

101772

Storytelling Cocoons

Open the zipper, spread out the play world, give free rein to the imagination, and start playing. The lovingly designed play worlds – farm, fairy tale forest, and family residence – encourage new ideas again and again using the figures. Scenes from everyday life can be re-enacted as well as the fairy tales "Little Red Riding Hood," "Hansel and Gretel," or "The Frog Prince." Ideal for language development and in the field of German as a Second Language for vocabulary expansion and stimulating storytelling.

Contents: 33 pieces.

3 storytelling cocoons (family, farm, fairy tale forest), exterior made of felt, interior made of fabric (can be wiped clean) – each cocoon includes 10 wooden play figures (each 1.2 cm thick).

Dimensions: Play area approx. 43.6 x 20 cm, closed cocoon (with loop) approx. 9.5 x 48 cm, girl approx. 3.4 x 4.9 cm.

Features:

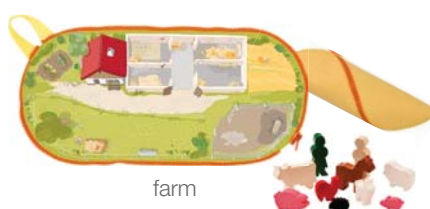

- three play worlds that can be rolled up: farm, fairy tale forest, and family
- with all-round zipper
- includes 10 wooden play figures for each play world
- flexible and can be taken along anywhere

| wooden figures included

fairy tale forest

farm

Language Lab

What belongs together? Picture cards on a specific topic are placed in each of the 6 compartments of the language lab. The cards can be arranged according to different criteria: opposites, similarities, chronological order, understanding of spatial positioning (prepositions), or affinities. Each topic can be worked out differently: by speaking, listening, reading, writing, or movements. Playable alone, in pairs, or in groups. The instructions explain individual exercises and possible variations.

Contents: 136 picture cards (6 x 6 cm), arranging boards, 1 set of instructions.
Material: Picture cards and chest of drawers made of sturdy cardboard.
Dimensions: W 36 x H 12 x D 17.6 cm.

Features:

- 136 picture cards for training visual and auditory perception
- with chest of drawers made of sturdy cardboard and detailed instructions
- fosters vocabulary, cognition, development of reading and writing

Action Die

Very versatile. Children can design their own pictures to decorate the transparent panels. The pictures could be of numbers, letters, pictograms, simple images, etc. The dice are very light and can be cleaned using a damp cloth. Material: PU foam, cover 600D 100% polyester, PVC film.
Dimensions: small dice 9.5 x 9.5 x 9.5 cm, large dice 18.5 x 18.5 x 18.5 cm.

Picture Cards "At Home"

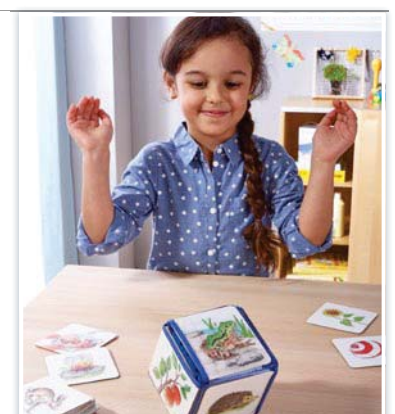

This box contains scene picture cards on the following topics: living room, bedroom, study, dining room, household/laundry, bathroom/personal hygiene and kitchen/cooking/baking. There are also matching small cards, with objects, furniture, activities and actions which can be seen on the large picture cards. The players recognize and name what they see, and allocate the cards thematically or in terms of time. There are various allocation options: scene - items/furniture, scene - activities, activities - items. In the process players expand their vocabulary and are encouraged to talk about their everyday life and home life. Everything is stored in a sorting box with drawers. Each drawer has a picture, so that it's easy to recognize which theme it contains.

Contents: 262 pieces.

Sorting box with drawers (W 40 x H 17 x D 20 cm) with 15 large picture cards (18 x 18 cm) on 7 everyday themes, 245 small cards (9 x 9 cm) and detailed instructions with lots of usage examples. Material: robust cardboard.

Features:

- quick access thanks to clear picture identification
- picture cards for language development and vocabulary expansion
- encourage concentration and looking closely

379241

Fröbel Alphabet

Learning how to speak and write are key principles in Friedrich Fröbel's pedagogy. This placing game helps to teach the alphabet. Freely, or in a pattern, the rainbow-colored pieces are placed on the base to create letters, word, and pictures. The Alphabet game helps children to practice writing and reading, and can inspire discussions and learning opportunities about many topics.

Contents: 946 pieces. 6 card bases (A4), 912 wooden pieces in 5 shapes and 6 colors (red, orange, yellow, green, blue, and purple), 25 templates in German and 3 templates in English, French, Polish, Spanish, Italian, and Dutch, instructions.

Features:

- helps children to learn the alphabet, write, and read
- inspires discussions and learning opportunities
- expands vocabulary, word and picture matching, and creativity
- helps to develop fine motor skills (pincer grasp), hand-eye coordination, color, shape, and theme sorting, literacy, and imagination

Role Play & Room Accessories

Children love trying out different roles for themselves. Whether it's a princess, knight, policeman, doctor or animal. Their imagination is constantly stimulated based on their age and the world around them. Role play is a key component of children's development and has a strong effect on them. As most games are played with friends, teachers or parents, these games quickly become part of the children's social interactions. This thus encourages children to try new patterns of behavior, ways of speaking, and creative ideas. Everyone involved shows different emotions and behaviors; these all require a reaction.

Role play enables children to immerse themselves in other worlds and characters and express their ability to act independently.

145028

Castle Fairytale World

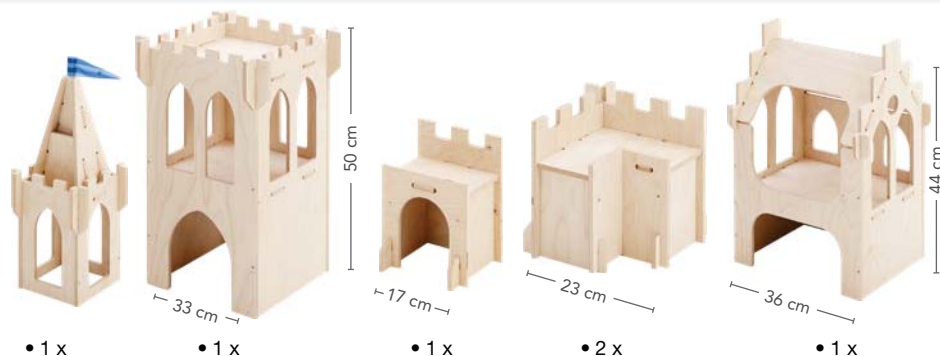

The large fairytale castle is extremely robust and sturdy. The towers and building parts are firmly preassembled. They can be combined with each other any number of ways, but also stand individually. The extra-large opening of the castle allows comfortable playing and varied role plays. The perfect addition to: Knight's Castle (item no. 109160) and Expansion Set (item no. 028901).

Contents: 8 pieces.

1 portal, 1 large and 1 small princess tower, 1 castle terrace, 1 ballroom, 1 wall corner, 1 small wall, 1 flag. Material: birch veneer, 9 mm thick. Dimensions for comparison purposes: large tower 27 x 27 cm, H 50 cm.

Features:

- preassembled, free-standing elements with lots of assembly variations
- extra-large openings
- perfect for imaginative role playing

free standing

Material: 8 mm thick

Knight's Castle

Many assembly variations Whether it's a knights' tournament or a battle between two knights, the walls and towers of the castle will stand firm. In any case, they can always be re-built. All elements stand on their own, so they can also be used individually. There are colonnades for playing with worked into the city walls. Contents: 3 small and 1 large tower, 1 drawbridge, 3 large and 2 small city walls.

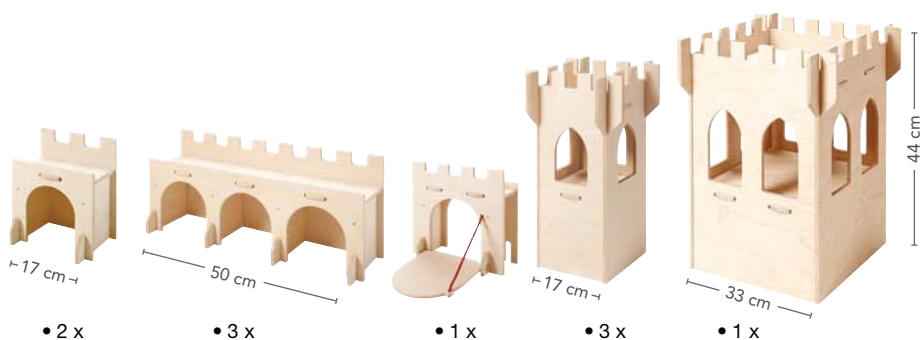

Material: Birch plywood, 9 mm thick. Dimensions: large tower L 33 x W 33 x H 44 cm, large city wall L 50 x H 21 x D 17 cm, small city wall 17 x 17 cm, H 21 cm.

For individual labeling with markers that are also suitable for overhead projectors.

Contents: 40 pieces.

20 cards, 9 x 9 cm and 20 cards, 6 x 15 cm.

368352

Birthday Calendar

The Birthday Calendar comprises different-colored sliding elements with a viewing window and a knob. It can be expanded so that there is a space for every child. The crown designates the birthday child. The calendar can be combined with the following project ideas: For their first birthday in the setting, the birthday child receives a string of beads to wear as a bracelet. On each birthday, they can choose a bead and thread it on to the bracelet. The bracelet can be hung up on the knob next to the viewing window. At the end of their time in the preschool, children can take their bracelets with them as a souvenir. Material: Birch; plastic viewing window.

Dimensions: Rail L 82 x H 6 x D 2 cm.

368356

Expansion for the Birthday Calendar

Material: Birch; plastic viewing window.

Dimensions: Rail: L 45.5 x H 6 x D 2 cm.

188968

"Edu" Teaching Clock

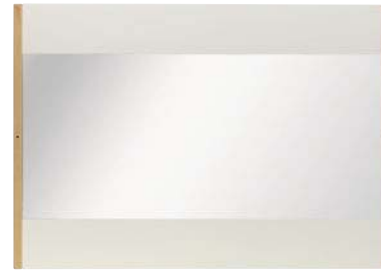

Instead of a dial, the teaching and play clock has 12 indentations which hold wooden dice to display the time. Each dice can show 6 different times. Both a 12-hour and 24-hour cycle can be displayed as well as the quarter hour principle. The day / night cycle, some fractions, and correlations of numbers can also be integrated into the learning process. Requires XX batteries.

Contents: 13 pieces.

Teaching clock, 12 wooden dice, instructions.
Wood. Dimensions: L 29 x W 29 x H 6 cm.

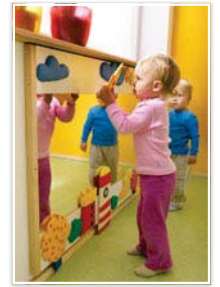

Features:

- different ways of showing the time
- teaches understanding of time and the passage of time
- high-quality quartz mechanism
- can be adjusted forwards and backwards for practice
- can be mounted and hung on a wall
- adjustable angle

Mirror Decoration

Material: Plywood, 6 mm. Dimensions: 59.4 x 20.2 cm. inc. hook-and-loop fasteners.

D 368374 Bird, 31.6 x 19 cm

E 370170 Hedgehog, 31.6 x 19 cm

F 368368 Snail, 26.9 x 26.9 cm

G 370150 Sunflower, 59.4 x 20.2 cm

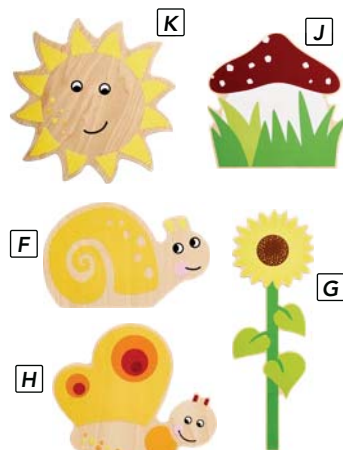

H 368370 Butterfly, 19.9 x 16.4 cm

J 370169 Mushroom, 27.6 x 29 cm

K 370135 Sun, 26.9 x 26.9 cm

Features:

- for decorating mirrors, cabinets, doors, etc.
- can be combined with other mirror decoration pictures
- easy to stick

 **COMBINE WITH ITEM NO. 697760!**

| incl. hook- and - loop fasteners

Special Needs

Every person is an individual with their own character, behavior, opinions, preferences, and needs. Educators are particularly challenged by children with special needs, but what counts as special? Children can be very relaxed and unprejudiced when dealing with each other's quirks. The important thing is that all children are looked after, challenged, and encouraged equally. Using resources appropriate for the child's age and their developmental stage as well as their strengths and weaknesses facilitates strong, formative progress, enabling them to grow into a capable, healthy adult.

Therapy Doll "Toni"

Made in
Germany

146824

Therapy Doll "Toni"

Ideal training doll for learning manual techniques, Vojta Therapy and the Bobath concept. The head of the neutral doll rotates +/- 110 degrees; the limbs are quilted at the joints and therefore fully flexible. Thanks to the elastane in the warp-knit fabric, the body structure can be put back in its original position. Large field of application: in speech therapy, ergo therapy, child psychology, psychiatry and geriatric care, and as a soft and cuddly doll for playing with.

Washable at 40°C in the gentle cycle. Cover: cotton warp-knit fabric with 5% elastane; hair made of mohair/cotton blend, firmly sewn in, tear resistant. Filling: siliconized cotton wadding. Size: 65 cm. Delivered without clothes. Fits normal baby clothes in size 62/68.

Features:

- versatile: as a doll and for a wide variety of therapies
- head rotates by +/- 110°
- fully flexible limbs
- developed by a physiotherapist

Example: Vojta-therapy reflex turnover

3+ years 1+ player varies

054940

Spiky Balls

For touching and feeling.

Contents: 12 pieces.

Material: soft, solidly colored plastic with grip-friendly spikes. Color dependent on stocks. 3 pieces each.

(As each item is unique, the objects worked in and the fabric colors may vary.)

148204

Tactile Braid

The grasping braid enables activation through "grasping": with its soft, pleasant fabric and tactile stimuli in the form of small, securely worked in objects, it arouses the interest and curiosity of people suffering from dementia and encourages them to touch and explore. The grasping braid can be used while sitting or can be mounted over the bed for bedridden people. For hanging or fastening – only to sturdy objects! – a carabiner is required. Order at the same time: carabiner hook (item no. 644255). If using without fastening, remove the carabiner. As each item is unique, the objects worked in and the fabric colors may vary.

Material: soft fabric. Washable by hand. Dimensions: approx. 64 x 10 x 6 cm.

Features:

- invites the hands to touch, grip and explore
- especially suitable for people suffering from dementia
- can be hung up with carabiner
- patented and manufactured in Germany

032412

Therapy Swing "Easy"

The swing consists of a stable, lightweight core that is padded on the upper side and at the edges. Thanks to an adjustable height, swing surface that can be tilted, and different suspension points (1, 2, 3, and 4 point suspension), it is suitable for many uses.

Material: soft padding with washable artificial leather cover (complies with the requirements in accordance with Oeko-Tex-Standard 100, product class 1). Dimensions: 80 x 80 x 8.5 cm; suspension height: 1.75 - 3.2 m. Color: light blue. Weight: 10.2 kg. Load capacity: max. 120 kg. Order at the same time: karabiner (item no. 644255).

Features:

- swing with padded seat for a wide variety of uses
- height can be adjusted
- seat can be tilted

MORE SWINGS
p.33 and p.35

644255

Snap Hook

For all hammocks. With screw locking. Combinable with Swinging Tire (item no. 055035).

Contents: 1 piece.
Carabiner, 10.5 x 5.5 cm,
Load capacity: 1,500 kg.

Features:

- for quick fastening to loops and straps
- enables safe playing and swinging in all kinds of hammocks

164037

"Vario" Weighted Blanket

The silky soft weighted blanket enfolds you like a huge "hug", encouraging physical and mental relaxation, and increased self-awareness. It is fully reversible, with a colorful, inspiring side and a relaxing, gray side. The 81 carefully stitched squares are filled with high-quality pellets. The different fabrics of the 5 pockets along the edge are highly tactile and can be filled with weights or padding material. A second blanket (please order separately) can be attached to the press studs almost seamlessly.

Material: 100% polyester, filling: Plastic granulate. Dimensions: L 114 x W 86 cm. Weight: 2.3 kg. The cover can be washed at 40 °C on a delicate cycle.

Features:

- helps to develop sensory perception, cognition, and relaxation
- modify weight by pocket fillings

combinable due to press studs

6 double -
sided discs on 12 topics

Made in
Germany

208411 Puzzle Wheel

Turning the puzzle wheel reveals another image, inspiring questions or discussions. Includes 6 double-sided printed discs on 12 topics (professions, vehicles, colors, shapes, vegetables, household, seasons and nature, clothing, fairy tales, fruit, famous buildings, animals) and a blank disc to create your own topics. Can be set up using the stand or propped against a wall.

Material: wood Dimensions:
Base approx. 45 x 18 cm, discs Ø approx. 45 cm.

Features:

- creates opportunities for conversation
- helps to strengthen cognitive and linguistic skills
- can also be mounted on the wall

1+ player

varies

Turn the wheel to discover!

Just open the wheel...

... and change to the topic of your choice.

Can be mounted to the wall

207505

Tower Stack

Sophisticated stacking game: Using gripping tools, the players try to build the highest possible towers made from cylinders, flowers, and circles. Pliers and scissors can be opened easily or with difficulty depending on how close the elastic bands are attached to their fulcrum. Both tools have in addition different opening and closing mechanisms.

Contents: 62 pieces.

1 pair pliers, 1 scissors, 5 elastic bands with different resistance, 12 disks (6 flowers, 6 circles), 48 cylinders in 4 colors (12 pieces per color) and 3 sizes (L 6 cm, Ø 2 cm; L 3 cm, Ø 1 cm; L 1,5 cm, Ø 1,5 cm). Material: Wood, elastic.

Dimensions: pliers L 23 cm, scissors L 27 cm, thickness 2 cm each.

Features:

- promotes fine motor skills and hand-eye coordination
- trains the differentiation of sizes and colors
- stimulates visual and spatial perception

Fine Motor Training: Assemble and Disassemble

illustrated cards
with step-by-step
instructions

193548

Motor Skills Assembly Kit "Bird House"

Not intended for the birds outside, but as an exercise object, e.g. for motor function training. The bird house is assembled with the help of 11 numbered work plan cards, which show the step-by-step assembly using illustrations.

Contents: 54 pieces.

robust assembly kit made of birch multiplex and beech, screws and nuts, 11 work cards (DIN A5), 1 set of instructions. Bird house dimensions: W 32 x H 22 x D 23.5 cm. The assembly kit does not contain any tools! A Phillips screwdriver PH 2 and a wrench with a 10 mm open end are required. Please order mini workshop or other tools separately.

Features:

- encourages finger motor skills and forward planning
- easy assembly thanks to numbered work plan cards with illustrations
- can be dismantled and reassembled again and again

Made in
Germany

384800

Feel and Race

This game follows the familiar rules, but the game board has fewer fields and each player only has two figures. This makes the game much shorter! The play figures are easy to grip and can't fall down, thanks to the recessed fields. In addition, the heads of the play figures are shaped differently, so that players with impaired vision can recognize their players by touch.

Contents: 12 pieces.

Board made from birch wood (25,5 x 25,5 cm), 8 counters Ø 2,5 x H 5,5, 2 dices (1 - 3 spots and 1 - 6 spots) and instructions.

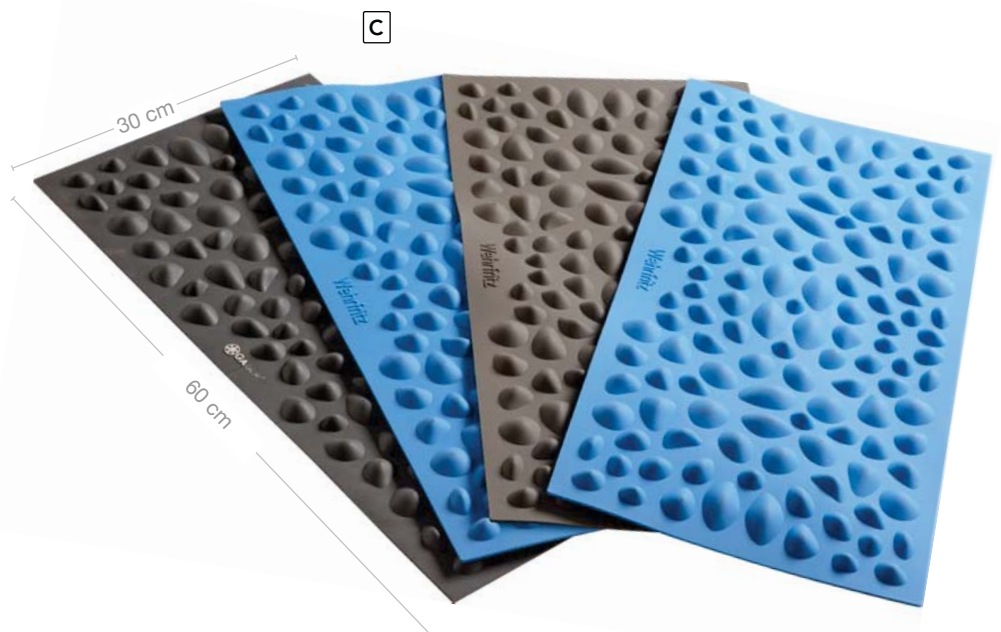

Just Like Walking on Pebbles

Pebble Beach Sensory Mat

With their special relief, the non-slip sensory mats imitate pebbles and give you the feeling of walking on a pebble beach when you walk over them. When stepping on the "stones" the foot reflex zones and blood circulation are stimulated. If several mats are combined with each other or with other equipment, different obstacle courses can be set up and adapted to the individual therapy goals and indications. The mats can be used for standing, sitting, or walking over.

Material: soft plastic.

Dimensions: L 60 x W 30 cm.

- A** 208404 blue, 1 piece
- B** 208405 gray, 1 piece
- C** 208406 set of 4

Features:

- tactile stimulation of the foot reflex zones
- training of gait and stability
- for group & individual use

Creativity & Art Materials

Creativity is closely linked with curiosity and the desire to make something new with the resources and materials available. When children have sufficient time and a stimulating environment, most will find it very easy to awaken their creative energies. They will quickly try new things and design something themselves, putting their ideas into practice and developing them. Children are proud to show what they have made, often giving their creations away and thereby gaining in self-confidence. The knowledge that they have made something using their own imagination and their own hands gives them the strength to face future challenges.

movement

ç^rə ɪl^vɪ^y = Creativity

... is the ability to approach challenges in a spirit of discovery and enquiry, and to carry out tasks using imagination and predictive and creative thinking. It is an ability that can be used to shape reality. Thinking and acting creatively is linked with cognitive processes such as problem-solving strategies and flexibility. Children have incredible potential for creativity, because they

naturally experiment using trial and error. Finding solutions for tasks and problems on their own, for example, enables them to practice their creativity. Activities like drawing or sculpting are key for developing thoughts and feelings. Free experimenting and creating supports complex thought operations and problem-solving skills, and promotes freedom of expression and self-awareness.

CREATIVE ACTIVITIES

- Drawing complete stories
- Depicting connections
- Arranging elements spatially on a horizontal reference line
- Aligning pictorial elements to the area coordinates
- Drawing images of the outside world

- "X-rays" (draw internal and external view)
- Reference line pictures: Line on the ground, set from above / below
- Depicting people, then animals, plants, and everyday objects
- Increasing depiction and detailed representation of body parts and objects that interest the child
- Painting is not just about depicting, it's learning and understanding

- Drawing on both sides of the paper. There is no top and bottom of the sheet.
- "Tadpole People" where the head represents the whole person
- Shapes controlled by the hand and wrist
- "Circle of me": Border between the self and the outside world
- First deliberate lines (first circles and crosses)

- Random scribbling – controlled scribbling – first purposeful scribbling
- Written scribbles (imitating writing)
- First desire to express: cross-shaped groupings
- Following movement: curves, circles, zig-zag scribbling
- Pointed scribbling (putting pencil to paper)
- Painting based on inner experience, without naming or explanation

- Marking locations
- Smudging and smearing
- Learning about materials

SCULPTURAL CREATIVITY

- Increase in the size of creative sculptures
- Three-dimensional creations
- Refining and combining approaches
- Developing different means of expression

- Combining materials
- Discovering ways of shaping surfaces
- Developing combinations of elementary shapes
- Learning how to depict complex shapes (e.g. people)
- Three-dimensional depictions of simple shapes
- Naming shapes and developing first purposeful depictions
- Focusing on the process of depiction, not the result

- Rhythmic coordination between palms and fingers
- Creating "sausages", "worms", and "balls"

- Using both hands to work on the material (e.g. clay)
- Using individual fingers or a flat hand
- Creating random shapes

- Understanding using the senses (touch, hear, taste, move, smell)

Painting Apron

Always fits thanks to the Velcro fasteners that ensure that the width of the apron can be adjusted in no time and that the rolled-up sleeves stay put. They also close the painting apron at the wrist, back and neck.

Contents: 3 pieces.

Material: nylon, washable at 30°C. Dimensions: L 60 cm, W max. 40 cm, sleeve length 45 cm.

Features:

- 3 handy painting aprons to protect against paint spots
- adjustable width and sleeve length
- comfortable width at the neck

Finger Paints

Finger Paints

Can be used with a sponge, fingers or brushes, and have a high opacity. Can be mixed, spread well and are washable. Tip: Wash any spots out immediately with lukewarm water and dish-washing detergent.

Each bottle, 750 ml

- 071004 yellow
- 071788 orange
- 071007 brown
- 071001 red
- 072178 purple
- 071006 white
- 071003 green
- 072179 pink
- 071005 black
- 071002 blue

071830 Set, 8 x 750 ml

Finger Paints

The paste-like, opaque water-based paints are perfect for painting or dabbing with fingers, a sponge, or a brush. They are wipeable and washable, quick-drying, and adhere well to paper, cardboard or glass, so children can even paint on the windows. Special bitter ingredients discourage children from eating the paint.

Primar Paints

Primar Paints

Transparent, silky water-based paints. Mixing them with a matt craft paint creates a pearlescent effect. Brilliant as a wood glaze, too! The rich-colored paints will not run, can be mixed together, and are durable and smear-proof when dry. They can be washed off smooth surfaces and hands, and can be removed from most fabrics using cold, soapy water. Size: 750 ml.

Each bottle, je 750 ml

Scissors for Nursery School Children

Cuts only paper. These nursery school child-proof scissors are ideal for 220 g/m² cardboard.

Contents: 10 pieces.

Material: made completely of plastic. Color dependent on stock. Dimensions: L 12.5 cm.

070409

Helper Scissors

With return spring.

Contents: 2 pieces.

Material: plastic, metal. Total length: 17 cm.

"scissors for special needs"

self-opening to help out

non-stick coated

068639

Silhouette Scissors Set

Paper, cardboard, foils, corrugated cardboard, etc. can be cut precisely with the original silhouette scissors. Since one of the shears is non-stick coated, adhesive films, sticker film, etc. will not stick to the scissors. The soft grip of the second shear ensures comfortable cutting.

Contents: 2 pieces.

Dimensions: L 10.5 cm.

Features:

- adhesive-free, since non-stick coated
- soft grips
- 2 pieces in the set

070810

Scissor Stand

With 16 holes.

Material: solid beech. Size: 28 x 8 x 5.5 cm.

12 pairs of student scissors & one large pair of scissors

070797

Scissors Assortment

For the whole group.

Contents: 13 pieces.

Set with large paper scissors (21 cm) and 12 rounded crafting scissors (13 cm, 6 each red and blue). Material: stainless steel with plastic handle.

071830 Set, 8 x 750 ml

071830

Finger Paint Set

Can be used with a sponge, fingers or brushes, and have a high opacity. Can be mixed, spread well and are washable. Tip: Wash any spots out immediately with lukewarm water and dish-washing detergent.

Contents: 8 x 750 ml (red, orange, white, yellow, green, blue, brown, black).

Finger Paints

The paste-like, opaque water-based paints are perfect for painting or dabbing with fingers, a sponge, or a brush. They are wipeable and washable, quick-drying, and adhere well to paper, cardboard or glass, so children can even paint on the windows. Special bitter ingredients discourage children from eating the paint.

Before the rockets can shine with magical light, you will need to: assemble the wooden pieces, paint them imaginatively, thread the EL wire through the holes, and insert the batteries (please order separately). Two flashing options can be chosen using the switch.

Contents: for 6 pieces.

36 wooden cutouts, 6 EL wires in 6 colors with battery holder, instructions. Requires 12 x AA batteries (not included). Dimensions: approx. 16.5 x 12 x 7 cm. Degree of difficulty: medium.

Features:

- painting and threading fun with light effect
- simple idea with lots of room for creativity

367581

Making Set II

Anyone who liked the Making Set (item no. 207980) will love this set, too. Six children can play with the contents, including using the following 3 ideas: Hot wire, bee, fan animal. The instructions state everything you will need.

Contents: Instructions for 3 items to make, 10 m copper wire, 6 battery clips for 9V battery, 6 propellers (colors depend on stock), 12 flexible wire jumpers (red wire), 12 flexible wire jumpers (black wire), 6 mini vibration motors, 6 battery holders for button cells with on/off switch.

Features:

- box for three fantastic new making projects
- creative fun with little preparation
- a great first experience of electricity and technology

076519

Nail Pictures

Six different motifs have been printed on the plywood boards, but before you can hammer down the various nails and drawing pins with all your might, the motif has to be coloured in with craft paints or coloured pencils. If you want to, you can wrap wool around the nails and decorate the finished nail pictures with shells, buttons, little stones and more, to finish.

Contents: 6 pieces.

6 boards (20 x 20 cm, 14 mm thick). Please order nails separately.

Level of difficulty: light. ✂️ Age: 5+

070424

Tool Set in Wooden Tool Box

Practical combination. The tools are quickly put away in the handy wooden box and can be conveniently transported anywhere.

Contents: 18 pieces.

2 steel hammers à 200 g, 2 steel pliers, 2 flat files, 2 half round files, 4 hand saws, 4 household saws, 2 gimlets. Dimensions of the wooden box: approx. L 37 x W 18 x H 25 cm (with handle).

Molding Strips

Wooden toy and more to make yourself. Manual skills are fostered during measuring, sawing, sanding, and painting. For sawing, we recommend a saw board so that everything is nice and straight. So that the figures and animals stand up, they should be sawed off at least 1 cm thick. Pieces for hanging up can be thinner.

Note: Since the strips come directly from the manufacturer, the length will vary (approx. 40 - 60 cm). Depending on the thickness of the sawn off pieces, each molding will produce 30 - 50 pieces. For comparison: Rabbits 3 - 6.5 cm tall. Material: wood.

A 073090 Farm, 7 strips

B 073643 Easter animals, 4 strips

 **ACRYLIC PAINT**
p.179

068835

Hammer for Children

Fits perfectly in the hand.
With a short handle.

Contents: 2 pieces.

Material: wood, forged steel. Weight: 100 g.
Length 18.3 cm.

096533

Decorative Nails

Brass-plated, shiny, and with an especially large head. They can be easily hammered into cork panels, e.g., for shiny pictures.

Contents: 1000 pieces.

Dimensions: L 8 mm, Ø 8 mm.

076777

Snails Modeling Set

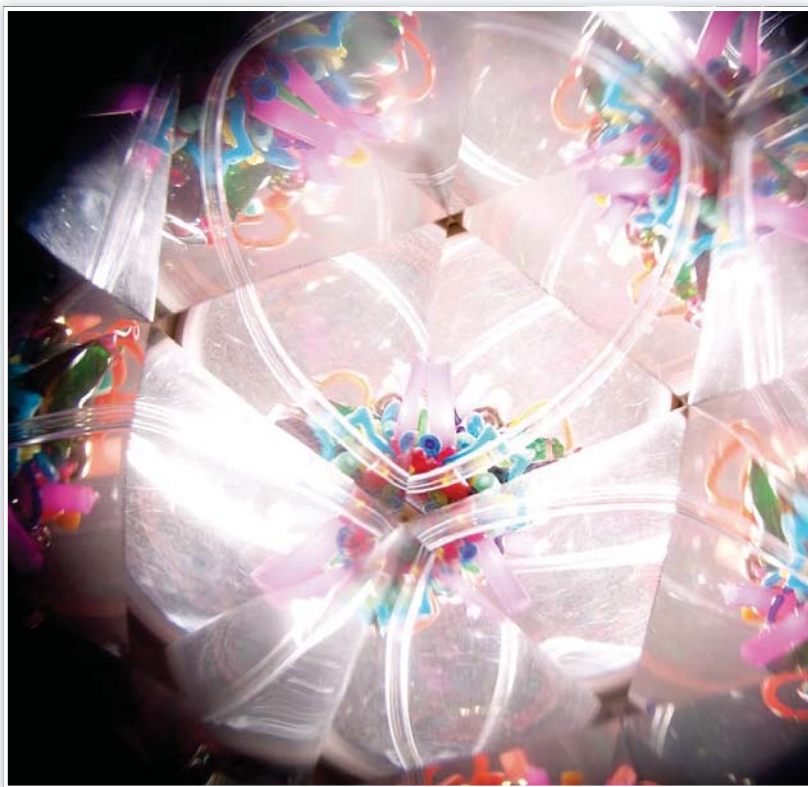

They are quickly modeled and decorated and a beautiful decoration for the windowsill. Height approx. 15 cm.

Contents: for 3 snails.

The packages contain sufficient material to complete 3 snails: plaster bandages, wooden rods, wooden balls, Styrofoam balls, and decorative material. Includes instructions.

Level of difficulty: medium. ✂✂✂ Age: 5+

063725

Sphere Kaleidoscope Set

Crafting it, looking through, and being in awe. The special thing about these kaleidoscopes: the sphere can be filled with something else at any time. The children can also experiment with different fillings, such as plant parts, screws or waste fabric. Also a look at the empty sphere is fascinating. The craft set yields 12 kaleidoscopes.

Contents: for 12 pieces.
Cardboard tubes (length approx. 21 cm), plastic caps, adhesive tape, acrylic spheres (Ø 7 cm), polystyrene mirror, transparent foil, cellular rubber, filling mixes, instructions.

Level of difficulty: medium.    Age: 5+

076921

Rainmaker Kit

For making musical instruments that make relaxing, rain-like noises.

Contents: for 12 pieces.
12 cardboard tubes (L 50 cm, Ø 7 cm), 1.5 kg roofing nails (approx. 600 pieces), 500 g plastic granulate, 100 g craft feathers, instructions.

Level of difficulty: easy.    Age: 5+

181193

Dreamcatcher

The high-quality wooden shapes with their attractive laser-cut designs can be individually painted, decorated with beads or feathers, and then hung over a bed as a dreamcatcher.

Contents: 10 pieces.

10 laser-cut wooden shapes in 2 designs.

Dimensions: Ø 10 cm, H 1.5 cm.

Material: Wood.

Level of difficulty: light.

Age: 4+

| 10 pieces

368052

Mini Wool Set

For decorating, crocheting, and knitting – lots of different colors for sewing and craft.

Contents: 30 pieces.

Material: Polyacrylic. Contents: 30 balls each 36 m long in 10 colors (yellow, orange, red, pink, white, purple, turquoise, light green, dark green, black).

| 30 pieces

328794

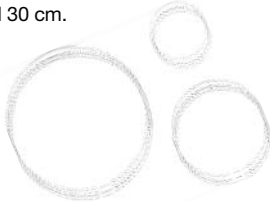

Metal Rings Set

White powder coated, welded, and with a smooth surface. To make dream catchers, wind ribbons, thread, cord, etc. around the metal rings. Also suitable for small wall hangings.

Contents: 3 pieces.

Material: Carbon steel.

Dimensions: Ø 12, 20, and 30 cm.

156607

Craft Feather Mix

ideal for playing dressing-up games, making dream catchers or costumes. Feathers of different sizes dyed with bright food coloring.

Contents: 100 g.

329010

XXL Decorative Stones

For decorating craft projects: Extra-large, easy to hold decorative stones in six different shapes and six bright colors.

Contents: 450 g.

Material: Plastic. Dimensions: biggest stone approx. 2.5 x 2.5 cm. approx. 450 pieces.

Age: 3+

069887

Tambourine Crafting Set

Sonorous tambourine – very easy to make yourself! Each cardboard base has over 12 holes at the edge. The colorful wool threads have to be skillfully threaded through these holes and the metal bells in turn attached. A small but nice musical instrument is created in no time at all!

Contents: for 12 pieces.

12 white cardboard bases (hexagonal, approx. 16.5 x 14.4 cm), 12 wool threads (L approx. 87 cm) in yellow, red, green, and blue, 144 metal bells. Includes illustrated instructions.

Level of difficulty: medium.
